Soon after, a foundation was founded that

closely connected to the projected cattle yard.

Mr Ernst Gerth, by profession: hatter, one of the word-leader in the city council and a chief carrier of the municipal cattle yard, traveled at the expense of the city to Paris to study street cleaning, and used his presence for a small private business. He had the concession for the New Berlin Horse-drawn Tram company, and after his return, this was on 31 July 1876, in conjunction with Parisian bankers, on 666,000 Thaler shares were founded. The first subscribers were the city councillors Ernst Gerth and Bendix Bernhardt and the city councillor Friedrich Romstädt, and in the supervisory board A Mr. Hermann Lehmann, who introduced himself as Comte de Barranca, a title of count that had until then been used in Berlin had not yet been heard and the audience almost went into an uproar. The new horse-drawn tram company built a line to the projected cattle yard, and then the A storm broke out in the press. Even the "Nationalzeitung", probably encouraged by the old cattle market society, asked indignantly: how city councillors and members of the magistrate establish how they "combine their official activities with their business ties in harmony." Mr Gerth was responsible in public assembly, calling for the "Vossische Newspaper" said: He had certainly not intended anything bad, and has not earned a penny, but only intended good and want to provide employment for the celebrating workers. In addition, he would rather get up two hours earlier and go to sleep three hours later," rather than duties as a city councilor. Unfortunately This apology was not appreciated; the old cattle market Society brought the entire surrounding district into

The election was so tumultuous and so bloody that the directors order a new one, and this time Mr. Gerth won, but immediately afterwards the supporters of the Cattle Market Society a thousand-voiced protest, and His election was also canceled. So we see that the founder will and led by them, Berlin has already in various divided into two camps, fighting each other with mouth and hand and engage in formal battles.

In 1875 he demanded 800,000 thalers, and Magistratus found the price very moderate, but the city councilors, under the leadership of Mr. Gerth, rejected pure by a large majority. In 1876, Givers only 735,000 thalers, and the magistrate strongly advised to take action, but the city councilors remained at their refusal. If the Commune is willing to wait, Geber will become much cheaper. Meanwhile, he also has in the city- has already won a strong party in the assembly, and one of his former opponents, who has now been eliminated Mr Leopold Ullstein, ultimately emphasized: Hermann Geber have made great contributions to the beautification of Berlin. Mr. Ullstein probably meant: the Centralstrasse, the City park with the Thalia Theater, the skating rink in the old Hofjäger, the Palais Royal, which remained on paper, which is now to become a "New Hotel Company" – but he forgot what bloody foundations these are and how many thousands of shareholders have invested their good money have paid for. |

manure, but when they returned home, the respective city councils ordered and city councillors must first be smoked out, and For weeks they were accompanied by their wives and daughters with viewed with extreme suspicion. In the lovely month of May, Mr. Hobrecht the "Siidclub" had fountains filled with dark liquids and showed him the beds where grow should be lettuce and strawberries, beets and asparagus, cauliflower and exotic vegetables. On the irrigation fields of Osdorf and Friederikenhof, the fathers of the city organized a communal Hunting and shooting several rabbits that they had brought with them. But the neighboring towns raised a great deal of scream that the sewage fields smell too strong and the air and the head of the office had an insight and took the Berlin sewerage system in punishment, and the district committee confirmed the wise judgment. Baurath Hobrecht, who also is a great speaker, wants to strengthen those who are weak in faith and comfort, and always refers to the sewage fields near Danzig, but these are wisely located in an area where no people schen live; besides, they also stink terribly and are already forming a single large puddle. The sewage fields at Berlin has cost about 1 million thalers so far, and yet they are only sufficient for a third of the houses. The canals lisation, for which the people's tribune Eugen Richter is estimated at 9 million thalers,

but has already claimed $7\frac{1}{2}$ million thalers and will certainly cost many millions more. Now the connection of the houses continues, which for each basic piece is compulsory and the costs of which are borne by the owner. The connection to the sewer system must be at least much than they cost themselves, and therefore the total is estimated Issue of 22 to 25 million thalers.

What wonder that with such an economy the
The city of Berlin's debt burden is growing exponentially!

According to the "Vossische Zeitung", in 1866 it was about 4 million thalers, in 1872 already 8 million Thaler and at the end of 1876 – 2% million Thaler, so that they have lost 23 million thalers or has increased almost sixfold. These bare facts proved the "Vossische Zeitung" in its issue of 18 November 1876 with figures that the communal taxes in Berlin during the last few years a very significant would have been deposed because the milling, slaughtering and game tax have been abolished. This Talmudic

distic calculation example reminds us of the representative neten Löwe-Calbe, who was at a soirée at the Reichs-Chancellor claimed that bread now costs him 20% less than before. "Well, you have to remember that!" Prince Bismarck is said to have proclaimed: "At what Bakers do you buy?"

Addendum.

Following a complaint by the Berlin Magistrate, the Chief President in Potsdam, which was canceled by the local government Election of Mr. Gerth declared valid, he is in the city-re-entered the prescribed assembly, and from the pres-steker, Dr. W. Jews, and almost every journal is staffed by Jews or Semites. For the last ten years Jewish journalists and writers so violently that they were attacked by the army of the press probably already make up the larger half, and the Christians are increasingly being pushed out. Various Jewish newspapers, such as the "Schlesische Presse" in Breslau, the "Berliner Tageblatt" by Rudolf Mosse in Berlin among others employ exclusively Jews, which incidentally is only logical and consistent. Only a small fraction part of the Jewish journalists and writers a scientific education that covers a large consists of former commis, and their favorite employment is still the stock exchange. The stock exchange and commercial sections of the newspapers, the Jews have leased, and even for the "German Imperial and Prussian State Gazette" A Jew delivers the stock market report. But they are fair in all saddles; a Jewish journalist writes with the same ease and directness editorials and feature articles, theatre reports and letters from the theater of war. Wallsee, Correspondent of the "Neue freie Presse", actually Abraham Feigl reported from the Serbian Army that two of his colleagues were wounded and

he himself was shot. The "Neue freie Presse" and other Jewish newspapers raised such a lament shouting that the Austrian government is researching chiren, where it now turned out that Abraham Feigl was healthy and unharmed and the whole story, just for the sake of effect, together The Serbian government ordered his Expulsion, but now Feigl–Leben had the nerve

It is self-evident from the stock exchange newspapers and notorious that they are in the pay of the stock exchange. They receive still today by the major banks and banking institutions certain subsidies on an ongoing basis, plus for each individual Business special bonuses; they are available at all green ations and emissions. During the Schwindelära emerged in Berlin, Breslau, Dresden, Cologne, Frankfurt a. Particularly dangerous were leaves which assumed the face of the interests of the small capitalist to represent, apparently took a stand against the stock exchange and “Revelations” were made, as the “Neue Börsenzeitung” and “Salings Börsenblatt”, especially since both are very skillfully edited and were able to entertain the reader pleasantly. Now that there is nothing left to lose, reveal and warn also the founders. |

The "Neue Börsenzeitung" was founded at the end of 1871 in Berlin, where Bernhard Brigl, the representative of leger of the "Tribüne", with a consortium of founders and Stockbrokers, including Carl Coppel and Leopold Ullstein, The "Neue Börsenzeitung" appeared, so to speak, masses as an appendage of the "tribune", and since they are in their program expressly at the service of private capital to protect it against the exploitation of the stock exchange for her task, she immediately gained a considerable following. number of subscribers, and awakened in the bosom of the "Berliner Börsencourier" the torments of jealousy. Shortly before the Krach, when the fat was skimmed off, took over the paper for sole responsibility of the previous publisher, Julius Treuheart, an educated and versatile man, and as the times

29*

– 452 –

worsened, he decided to start the newspaper at the same time a banking business for its customers, so that here Theory and practice live under one roof.

Soon after the "Neue Börsenzeitung" came "Saling's Börsenblatt" in Berlin, which is in a similar way, but the stock exchange's favor in an even higher Maasse won, and therefore did even better business.

Of course, it supported the dizziness as well as the old stock market newspapers, and provided, for example, an enthusiastic Advertisement for the super lazy Berlin Nordbaubank of the gentlemen Dr. Heinrich Ebeling and comrades. Mr. August Saling, former employee of Mr Killisch, was able to 'with his damaged nerves after only one year in private life and live comfortably from his pension. His He sold the sheet for the mere sum of 120,000 thalers. The unfortunate buyer, a landowner from West Prussia, thought he had found a gold mine, but soon afterwards The resulting crash ruined the business and made the owner thümer bankrupt. "Saling's Borsenblatt came under the hammer and finally left for 20 thalers.

The new editor, Adolf Braun, who soon called himself "Doctor of philosophy", made great efforts. He founded on March 4, 1873, with Heinrich Quistorp, Hermann Schäffer, Julius Rothstein, Hermann Weinreich, Hermann Lehmann, Julius Meyer Lehmann, Wilhelm Koch, Heymann Feldheim, Siegfried Brann, malt manufacturer Johann Hoff and legal lawyer Ewald Hecker, the German Premium, Credit and Rentenbank on 2 million Thaler shares. This was an installment lot deal that, following a recent ruling Decision of the Prussian High Court an unauthorized lottery and is therefore punishable. Mr Braun also founded also in March 1873, with Stern Rissmann and Max Löwenstein the Westphalian Steel and Puddling Works in Haspe, which the "Berliner Börsencourier", as publicly

– 453 –

was claimed, against a compensation of 500 thalers, in in the most brilliant colors. The share capital was 200,000 thalers; but the previous owner, Bernhard König, who acted as director, later admitted that he had only 10,000 Thaler deduction and nothing else received; whereupon Stern Rissmann, the President of the Supervisory Board, was removed from office, and appointed David Brinitzer as his successor. The Chamber of Commerce of the Hagen District officially declared that Bernhard König only a hammer mill, but not "large steel and puddling works", the latter being part of the new Society did not exist at all. In 1875 the establishment for the necessary subhastation and went for 40,000 thalers so that only the first mortgage was covered. Adolf Braun, although a "Doctor of Philosophy", did not proved to be absent, as the titleless August Saling; he is the Away from "Salings Börsenblatt": In 1876, the Villa under the hammer, which he sold on the Quistorp creation "Westend", in Nussbaum-Allee, and since then it seems he appears to have disappeared from the scene.

Stock market writers were also often the authors of the colourful prospectuses in which the shareholders of Heaven and earth promised, but afterwards, when the Founders were investigated for making false statements, were simply denied by them and mostly with luck. Such imaginative prospectuses, whose customers no longer to be determined (!), are, for example, those of the Egells' and the Wohler'sche Maschinenfabrik, as well as the Strausberg-Karstenian mining, iron and steel industry society, where the Founders were released because their friends and accomplices were did not reveal them to the press. Moritz Meyer, founder and editor-in-chief of the „New Yorker Handelszeitung“, which was presented in many newspapers thrown that he for the 1869 in Europe at the course of approx. 70 introduced, now rather worthless bonds of the Rockford-Rock Island Railway organized a shabby advertisement staltet – a note that also appears in the first part of this book – sent the author a “certificate” that to prove his innocence. Mr. Meyer gradually invested 16,000 dollars in those bonds, but not as a “bribe”, but as compensation for certain “personal services” (mediation between the construction entrepreneur HH Boody and the company Budge, Schiff & Co., who sold the bonds), and did not have this tip the least influence on the drafting of the articles, in which Mr Meyer strongly recommended the paper to the audience. – – This is the two-soul theory, which Mr. Leopold Sonnemann from the “Frankfurter Zeitung” successfully against his “detractors”! The actual effect but, and to a certain extent the humor of the story It now says that Mr Moritz Meyer, after the “Certificat” provided by himself, the famous bonds has only just been put into action, because the papers in Germany, where the paper is mostly housed, created, after Instructions from the “involved” bankers Hess & Katz in Berlin and FE Fuld & Co. in Frankfurt a. The stock market papers did what they could to please the fraudsters but their readership is limited. To

large mass to capture the whole people, was the help also the political press, all newspapers, big and small, necessary, and these were won partly directly, partly indirect. In every major town, the founders created

– 455 –

and stockbrokers their own organ by using an already existing either bought the paper or with a significant A considerable number of Newspapers became the property of banks and banking institutions over, and various newspapers were founded. Thus, the audience was given political food and prepared It was also a good thing for the stock market. Of course, these Leaves are now mere tools of the founders, although they have the pos-made the most siren leaps to give themselves the illusion of independency dependency; and although most of them have large shots required – they did very well. Of course, your shares are always in safe hands, and are rarely listed on the stock exchanges.

The “Königsberger Hartung'sche Zeitung”, the main newspaper of the province of East Prussia, was founded at the end of 1871 by the “conservative” Geh. Commerzienrath Moritz Simon, the “socialist” Adolf Samter, the “national liberal” banker Carl Jacob and the “progressive” Professor Dr. Möller. The latter gained the upper hand in politics, and so the Blatt, until then politically indifferent, a hot-headed Progressive organ, which Messrs Richter-Parisius with their written correspondence in which they pillory the “detractors” of the founders. The stock exchange part, however, remained the domain of Messrs. Simon, Samter and Jacob, all three known as evil founders. Jacob was convicted of fraudulent bankruptcy, and Simon, who assisted him, was sentenced to four weeks’ imprisonment. imprisoned, but afterwards fined 10,000 Thaler pardoned. For the foundations of Messrs Jacob, Samter, Simon and Emil Stephan, like “Vulcan”, “Insterburger Actien-Spinnerei”, brewery “Wickbold”, “Annahütte” etc., which which also partly occupied the public prosecutor’s office, the “Königsberger Hartung'sche Zeitung” of course lovingly and also did her duty by helping others

– 456 –

Founder and stock exchange newspapers diligently reprinted, and current stock exchange correspondence, e.g. in the case of the famous “West Prussian Ironworks”, was happy to accept. The Actien-

capital is 375,000 Thaler, and the shareholders received per 1873 – 11%, in 1875 even 12% dividend – a profitability, which is rare among established newspapers.

Moritz Simon is, because "Privy Counsellor of Commerce", of course typically "conservative", and because of the Strausberg-founded the "East Prussian Southern Railway", with the nobility of the Province. Therefore, it was actually his intention to "Hartung'sche Zeitung" a conservative or at least government-friendly attitude, which Jacob and all-if Samter would have agreed too; but Professor Möller and his comrades knew how to ensure that the stock company sailed under a progressive flag. Now there is another one in Königsberg, although much less widely circulated, but always much better edited paper, the conservative "Ostpreussische Zeitung". This commemorated the brilliant founder, Privy Counsellor Emil Stephan, to acquire, as best suits the stock market, a "national liberal" organ. But Simon came to him before; he felt the honorary duty to support the Conservative Party to do a service and had the "Ostpreussische Zeitung" It was founded on 75,000 Thaler shares, kept their tendency, and Simon's accomplices, sat in the Council of Views, while he, the "Conservative", was President of the Administrative Board of the enraged progressive "Hartung'schen Newspaper". The Jews are familiar with the business and to take their private feelings into account. The "Ostpreussische Zeitung" paid $6\frac{1}{2}$ / dividend in 1873, for 1874 but 0.

Various newspapers were founded in Silesia. "Messenger from the Giant Mountains", with 105,000 Thaler shares, distributed from 1873–1875: 6, 7 and 7% dividend respectively; and

– 457 –

is, by the way, a terrible "cultural warrior", but has great fear of the agrarians. The "Görlitzer Anzeiger", in whose administrative board the current representative, city councillor Lüders and other founders sat, gave his shareholders 1872 – 191/,, 1873 – 121%, 1874 – 8% dividend, and went later with the "Görlitzer Nach-" "direct" into the possession of a banking house.

In Breslau, the founders knew almost all the press annexed. After Berlin, Breslau is the most Jewish City of the Prussian state, and yet the word "Jew" not printed here at all. Main owner of the "Breslauer Zeitung" was the "Schlesischer Bankverein", whose Soul of Commerzienrath Fromberg is a baptized Jew

and founder of the first order. Since the public displeasure has turned against the parliamentary founders since the Public prosecutor finally took action against some start-ups, is the "Breslauer Zeitung", which is committed to progress, and, it seems, also by the Dioscuri Richter-Parisius served, has gone mad with rage and fear. She spoke of the "slander" that "her head" himself had against the deputy Hagen, whom the great Lasker defended as a thoroughly "correct founder"; and the "Vossische Zeitung" hastened to publish this article She shouted: "The rabble in Germany has have come together and say: we want to form a party of honest people!" – threw the "Germania", the "Staatsbürgerzeitung" and even the innocent "Kreuzzeitung" with Koth, and also pointed veiledly to her neighbor, who "Schlesische Zeitung" points out. "The founders are the founders hatz followed closely, one fashion disease triggers the other "She complained, and with Jewish impudence she declared: "The main blame lies with the audience!" – Your Editor-in-Chief is still Dr. Stein, a Democrat from 1848 and a honorable man, but he has become old and weak and

Around him sit half a dozen woolly-headed Jews. Horrible! If the good Eduard Trewendt could see what has been done with his paper, he would be in the Turn over the grave!

The Breslau founders created a second organ (Discontobank, Gebr. Guttentag, Marcus Nelken & Sohn, Sigmund Sachs, Gebrüder Friedländer) in the "Silesian Presse", which for the sake of variety, the national liberal colors. Founded by Jews, it only employs Jews. Its first editor was a Mr. Köbner, formerly at the "Hannöver'schen Courier" and a protégé of the cor- of its founder, Mr. von Bennigsen. Under him, the "Schlesische Presse" on 13 August 1875: "In this eye- Looking at the first signs are emerging that the big business from the prolonged illness that followed the crash begins to recover." But this prophecy came true not, and the "Schlesische Presse" did not work either forward, but backward. In the spring of 1876, it was not profitable, and Mr Schottländer taken over, behind which various bankers, such as Frieden- – thal, Heimann, Schweitzer etc. Köbner dropped out, and He was replaced by Dr. Alexander Meyer, who had previously been responsible for the "Breslauer Zeitung" had editorialized, and now the "Schlesi- schen Presse" on its feet.

Alexander Meyer was a feature writer about 12 years ago and reviewer of the "Weser-Zeitung", where he sometimes finds it convenient sirte that he liked the thoughts and sayings of the writer, which he had just had under the secir knife, for his own Even then, his mind was occupied by trade and Stock Exchange, and soon he became "Economist and Secretary of the Breslau Chamber of Commerce. He gained the favor of the large Founders Adalbert Delbrück and Emil Stephan and came as General Secretary of the German Trade Association to Berlin, where he earned a good income and only had to do moderately

– 459 –

But his Manchester tendencies were so crass, that they even displeased the stock market people, and a cold He received the call to Breslau and accepted it. The presidium, which he led in the association "Berliner Presse", He left it to his friend and fellow genius, Paul Lindau, and strengthened by a dinner that his colleagues gave, he set out on his journey.

Alexander the Great, as the "Germania" called him, described his accession to government in the , Silesian Press", by publishing an editorial: "The party of dirty Laundry." That is what he called the people who were the founders want to cleanse; and this must not be noticed, Because as we all know, "dirty laundry" is a hobby and historical peculiarity of the chosen people. Alexander Meyer does not want to wash his dirty laundry she still seems pure and clean enough to him, and whether like our parliaments of founders and supervisory boards swarming, he claims: "There is probably no other country in which there is a dispute between the people's representatives and the acquisitive interests are so weak that Germany. We hardly know whether we can respond to this fact matter with pride, whether with regret should see, alone the fact is certain." – Barely warmed up in Breslau Meyer the First caught Krakehl with the "Silesian Zeitung", which Mr. Löb Sonnemann, the owner the "Frankfurter Zeitung", not fast enough for a cor– the current consortium subscriber. But he fell completely short; Even the Breslau Press Association gave him a public Denial, and the "Schlesische Zeitung" declared that it was against Alexander the Great brought legal action against him for "true slanderous and defamatory allegations". He was even more vocal in his support of "Our Brown" and his famous Railway foundation Cuxhaven. Here, he exclaims, It was not the founders who deceived the public, but the other way around –

the public has betrayed the founders. – Arm in Arm with Eugenius Richter, who was the Minister of Agriculture with the Social Democrat Bebel, also accused Meyer the First Mr. Friedenthal socialist tendencies, because it represents the connection between industry and agriculture. bau had emphasized, In fact, two classic “economists”! For the sake of variety, Mr Meyer, as well as like his friend Bamberger, again in “Revelations”. Ludwig Bamberger emulated in the Lindau “Present” against the “Bahnhofs-Cutelette”, which, because of its small size, Bamberger's fame made Meyer not sleep. Even as a member of the supervisory board of “Flora” he had the privileges of the “first draftsmen” were attacked, which of course no meaning at all in the bleak situation of society had more: now he revealed a “new founding”, the Fraud by certain small building contractors and their financiers, which cheats craftsmen and suppliers. Such achievements had to be made by the “Schlesische Presse” and its Chief Editor thrive. “Fresh blood!” cried the “Silesian Zeitung” when the elections took place in the autumn of 1876; and the Breslauer elected two men of “ancient blood”, the two Jews Alexander Meyer and lawyer Freund in the Prussian House of Representatives.

The “Breslauer Morning Newspaper” by Mr Leopold Freund, which is dedicated to circulation of 25, 000, and certainly its owner a The Breslauer Handelsblatt had only about 800 copies, but its owner, Oscar Freund, made the columns narrower, increased the insertion fee from 1½ to 4 Sgr., served as a member of the supervisory board of various very well-founded stock companies and knew within to make a fortune in a short time. Even the “Breslauer Intelligence and Foreigners’ Journal” by Mr. E. Reimann, which is said to have only about 60 subscribers, was brimming with

Fraudulent macaw of founding prospectuses and issue advertisements. The advertising agency of Gottfried Daube in Frankfurt a. M. Stock market reports sent out by Breslau newspapers under the They printed the code D. and also took over Berlin newspapers.

To this founding king and to the notorious Rhineland schen Securities Bank, which only deals in founding and speculation was also closely connected with the “Rheinische Zeitung”, whose stock exchange editor, Advocat-Lawyer Vack, Swindle has rendered extraordinary services, and whose Proprietor, the well-known people's tribune and breakfast speaker Classen-Kappelman, as the “Frankfurter Zeitung” claims, was also one of the founders. Its former editor-in-chief, the MP Advocat Peter Klöppel, who is from the Progress to national liberalism and then took up a position at the “Nationalzeitung”, affirmed in June 1876 in in a letter to the “Kölnische Zeitung” that the Mr Vack's activities remained completely unknown, that He himself, like his political colleagues, “never in the

The Baierische Handelsbank in Munich bought the “Süd-German press”; and in Hanover, at the beginning of In 1872 a “newspaper stock company” with the commercial rath C. Rümpler at the head, who had two existing sheets merged into the “Hannoversche Courier”. The same is the organ of Messrs. von Bennigsen and Miquel, represented but also with equal skill the interests of the stock exchange.

In Berlin, three different banking institutions founded the “Spenerische Zeitung”, the “Post” and the “Norddeutsche All-

common newspaper". 1

The "Spener'sche Zeitung" was one of the two oldest newspapers in Berlin, of liberal tendencies, and was one of their subscribers also the Kaiser. At the beginning of 1872, she Major a. Wehrenpfennig against an annual salary of 6000 Thalers. He was also cautious enough to secure a capital of 12,000 thalers to be secured as compensation for the pension of 600 thalers, which he received as a former captain of the reptiles or official clerks, and to which he had to do without now. The arts section, in which the novel "The Children of the World" by Paul Heyse appeared, edited by Baron zu Putlitz, but soon resigned, because he was in contact with the very stubborn schoolmasterly gentleman Wehrenpfennig collided. Fees were not spared, but still nothing special was achieved; the number of Subscribers remained low, and the paper's attitude was did not harm the stock market either. Already in November 1873, the dissolution, and among the assembled shareholders we find many acquaintances, such as Paul Munk, Georg Beer, Gustav Markwald, Ignatz Witkowski, Paul Jüdel, Julius Alexander, Meyer Cohn, Hugo Pringsheim, Eduard Abel, Platho & Wolff, Theodor Heymanp, MP Miquel and the editors Julius Schweitzer, Emil Freystadt and August Brass. “Rothe Brass”, lived as a political refugee in the Switzerland, returned during the conflict and faced Mr. von Bismarck was at his disposal. He founded the “Nord-German Allgemeine Zeitung”, which has since been the official Organ, and in 1863 the Social Democrat Wilh. Liebknecht worked with Brass. Brass acquired a fortune, but finally seems to have come to an agreement with Prince Bismarck. to have disagreed, or rather the Minister of the Interior, Count of Eulenburg. In 1872 he sold his Blatt for a large sum to a consortium of Hamburg Businessmen, including the Ohlendorff brothers, who “through lucky speculation in damaged guano” millionaires and Senator Gustav Godeffroy (JC Godeffroy & Sohn), founder of the first order and chairman of the “Nord-German Bank” in Hamburg. A stock corporation was formed Society “Norddeutsche Allgemeine Zeitung, Norddeutsche Bank and Ohlendorff”, also took over from the Kreuz-newspaper, its offshoot “Preussisches Volksblatt”, and presented both journals in the service of the government. Gebrüder Ohlendorff, who bore the lion's share of the expenses, were raised to the nobility. The “Preussisches Volksblatt” is returned, and the “Norddeutsche Allgemeine Zeitung” will now require significant subsidies. It is still official, although the government likes to use it from time to time. Time to solemnly disavow. In the associated “North German Printing and Publishing House”, as the Company's new name is, the stenographic Reports of the Reichstag, as well as those previously published in Decker's Officin produced “German Imperial and Prussian State advertiser” is printed.

The “Post” was published since 1 August 1866 as a organ of the miracle doctor Strausberg, and had a colorful a mixed group of employees, such as Bruno Bauer, Julius Faucher and Ernst Dohm, the editor of the “Kladde”

Immediately afterwards, Mr. von Blanckenburg, the
friend of Prince Bismarck, Dr. Friedenthal refused the

Ministry of Agriculture, and now with this hear a strange change. While she previously led an idyllic still life, she suddenly unfolded a feverish activity. Department and personnel were increased, and the press had from then on far more of Dr. Friedenthal than to report on Dr. Bismarck himself, who before his almost overshadowed by his youngest colleagues. Every trip, every speech every order of the new Minister of Agriculture was extensively discussed and commented, all newspapers, Jewish and Christian, sang his praises and admiration. But that Ministry of Agriculture is for Dr. Friedenthal true apparently only a transit station; it has long been considered If Mr Camphausen or Mr Achenbach have something human should happen, for the successor of one or the other, especially since he knows how to deal with all parties, and how the Eugen Richter's cry of fear declared that Manchester does not exactly consider him immortal. Although Dr. Friedenthal is no longer nominally a co-owner of the "Post", this but a strong ministerial aftertaste, and above all, what the Ministry of Agriculture has on its mind, she is always the first and best informed.

Finally, from the Vienna "Neue Freie Presse", the also for many foundings of the new German Empire tively, it should be noted that it came into the possession of two banks. She always knew how to help different gentlemen to serve at the same time, e.g. the Turkish Strausberg, Baron Hirsch, the knight Ofenheim and the gentleman Gerson von Bleich-

Röder. The latter is now said to own most of the shares of the "Neue Free Press", and in addition to it 50-60 papers command.

The temptation to let yourself be founded is in the swing delära probably approached every major paper, and the refused, perhaps only out of caution and prudence. Many other newspapers may also secretly support banks and Banks have taken on as partners. But the Founders and stockbrokers hardly needed anything like that; For the sake of advertisements, the whole press came to them with open She was always ready to do any kindness, any service ready. finally brought 100 – 500 thalers. The prospectuses and Emissions notices were printed in inch-high letters and large white spaces, whereupon the typesetters also so-called “bacon”, the unprinted space paid for and enforced this entirely legitimate demand. Founding advertisements became even more expensive than other advertisements pays; the “Neue Freie Presse” in Vienna demanded 1 guilder per line, the “Augsburger Allgemeine” 17 Sgr. “Reclamen” calculated the “Weltblatt”, the Kölnische Zeitung per line with 1 Thaler, and the Augsburg's “Allgemeine Zeitung” is even said to have charged 2 Thaler 25 Sgr. Large leaves have been in the dizzy era 2000 to 5000 Thaler were pocketed daily for advertisements; They even attacked foundations in the advertising section For the sake of advertisements, every local leaflet a course sheet and a disproportionate large part of the stock market. appeared in identical and simultaneous form in newspapers of the various directions, e.g. in the “National”, “Vossian”, “Volkszeitung”, “Norddeutsche Allgemeine”, “Kreuz- newspaper”, and – it sounds almost unbelievable – also in the “Deutsche schen Reichs- und Preussischen Staatsanzeiger” (German Reich and Prussian State Gazette). we: What on earth does the “Staatsanzeiger” have to do with stock market notes? Would it not be enough if he, as before, was limited to printing the course slip?

The “democratic” “Frankfurter Zeitung” is, as

The "Kölnische Zeitung" rightly noted – the two Accomplices quarreled publicly – the largest southern German Börsenblatt. Mr. Löb Sonnemann was invited to many green ments, but not as owners of the "Frankfurter Zeitung" – God forbid! – no, just as a "capitalist"* and "business friend", and also the editor of the stock exchange partly, Mr Bernhard Doctor. It has even happened that the "Frankfurter Zeitung" foundations, in which the gentlemen

– 469 –

Sonnemann and Doctor were "involved" with large sums of money, Therefore, the court also declared Mr. Sonnemann for a man of honour who had been slandered, and the Frankfurters nominated him again as a candidate for the Parliament. However, Mr Sonnemann was, after this defamation trial so cautiously to refuse the mandate offered Mr Sonnemann also claimed to have rejected an offer Bleichröder's, and as is well known, As a member of the Reichstag, he refused to accept the iron free train ticket, sent it back with solemn protest and praised himself for this with a great moral speech. Several Weeks later, however, he quietly came to the said freedom card again and used it extensively.

From a public statement by Mr. Carl Volckhausen, former editor-in-chief of the "Frankfurter Zeitung", dd Düsseldorf on 21 June 1876, by the way, it is clear that every founding the stock exchange editors of all Frankfurt were "involved" in the papers; Mr. Bernhard Doctor, also Correspondent for the "Times" and the "Semaine financière", always with the largest sums. This has increased as a result of a "Paralysis" withdrew into private life.

The "Danziger Zeitung" came up with the idea of founding so powerfully that even in the "Neue Börsen-newspaper" complaint was filed. Its owner, Mr. Heinrich Rickert, is one of the few journalists who to become a newspaper owner, and since then he was active in public life. First he was a city councillor in Danzig, he was elected to Parliament, where he, like his friend, the former liquidator of the Geneva bank, retired lawyer Lipke, quickly won an outstanding role, and finally He even became the regional director of the province of Prussia with the Salary of an Under Secretary of State.

The "Kreuzzeitung" complained about the proliferation so many new stock market papers, but, as the "Neue

Börsenzeitung” rightly replied, at the same time advertising for the old stock exchange newspaper. While in the editorial she spoke out against the foundations in general, treated them in the “Stock exchange backbone” every single foundation with Christian Schonung. Mr. von Nathusius-Ludom, who on 1 October 1872 took over the editor-in-chief position, is personally a man of honour, but he did not know that his stock exchange advisors were founders and Founding comrades; he believed in his uncle, the Ge-helpers of the Discontogesellschaft, Privy Councillor Scheele, whom he the most selfless man in the world, and on the Testimony of Mr. Scheele, who together with Miquel founded, he defended it as a completely correct Founder. The second editor, Dr. Heffter, has always been the Founders want to convert with the Gospel, and under the current editor-in-chief, Mr. von Niebelschütz, observed the “Kreuzzeitung” regarding the movement against the parliamentary mental founder a diplomatic silence.

The Berlin “tribune” of the Mr. B. Brigl, a gossip magazine that primarily in the circles of the stock exchange and the Jews, and in the main Jews also have the floor. In their issue of On October 2, 1869, she published the famous article “The Man, who buys everything” with the bust of the miracle doctor and the Motto: Honny soit qui mal y pense. Strausberg is seen here as a “Hero” of culture, celebrated as a benefactor of humanity. “Thousands and thousands live from him and through him.” “Wherever Strousberg puts his hand, new life grows.” The article was aimed at selling the then rampant Ru-German railway bonds. As Wuttke (“The German magazines”, 3rd edition p. 431) claims that the “Tribüne” and its associated humor paper “Berliner Wespen” in the founding era to a stock exchange consortium for the Price of 150,000 Thaler. In any case, professional Founders such as Braun-Wiesbaden, Leopold Ullstein, Carl Coppel etc.

her employees; she had her advisor for stocks and founded the “Neue Börsenzeitung”. Nevertheless, she thumped her chest, boasting of her honesty and made “revelations”, for example, very recently in Subject of the so-called “revolver property buyers”. . With Bamberger, Lasker, Richter and the “Nationalzeitung” invented she called the “slander era” and insulted the accusers of the founders in the meanest way. As long as they focus on the gossip limited to the piquant manner in which she was able to prepare, she was in her

Kind not bad, but for about a year now she has been behaving as political newspaper and has now become a boring hodgepodge.

The weekly magazine "Die Gegenwart", which was founded in 1872 by Paul Lindau has already been mentioned several times. It began with political science treatises by Bluntschli and with – Stock exchange presentations by Albert Brockhoff, varied the menu chester wisdom in articles by Bamberger, HB Oppenheim, by Unruh, Kapp, Braun-Wiesbaden, Alexander Meyer, Adolf Samter etc. and brought some extremely boring essays e.g. "On World and State Wisdom by Lasker. It is written mainly by Jews for Jews; Everything that is Christian, like Heyse, Freytag, Gottschall, Gutzkow, Julian Schmidt, on the other hand, is being downgraded as much as possible. Unfortunately, Some of these men also allow themselves to be influenced afterwards, to contribute to the "present" and thus with their names an unprecedented advertisement for a completely useless company company. Paul Lindau is a man of very ambitious orderly education and all his artistry is the Jewish syllable-piercing wit; only noble audacity and tenacious, restless ambition have helped him to achieve elected people 'famous', making him the first dramatist of the new German Reich. He pushed through it, that his photograph hangs in all shop windows, his Portrait in the Leipzig "Illustrierten Zeitung", in "Ueber Land and Sea", and recently also in the "Gartenlaube" with text

The "Nationalzeitung" was founded in the spring of 1848 by Christian people and with Christian money, but went soon passed into Jewish hands, as the hitherto entirely middle-class loose editor of the paper, Benda Wolff, the deeply fallen During the reaction period, the "Nationalzeitung" is constantly in danger of being suppressed and it owes its preservation only to the fact that that Mr. Wolff simultaneously founded the well-known Telegraph Bureau and thereby entered into intimate relations with the government The editor-in-chief of the "Nationalzeitung" was impressed by her founded until the end of 1874, longer than a quarter of a century, Dr. Friedrich Zabel, and under him the paper gained the significance and the reputation that it enjoys today. It courted not about the applause of the uneducated audience, but it set his ambition to develop the socially and scientifically educated circles. Zabel was a man of unconditional honesty, of great kindness and sincere goodwill towards everyone. stance. No other journalist in Berlin has taken such a prestigious position, to face such a Respect please, like Friedrich Zabel.

But the "Nationalzeitung" was also a stock exchange and Handelsblatt, and this site has been increasingly prominent since 1866. in the foreground. Of the 18 columns of the evening issue The stock exchange finally took up 12-13 columns, and Mr. Julius Schweitzer, who edited this part entirely independently, did not allow anyone to interfere in his department, surrounded himself with half a dozen assistants, mostly Relatives or Jews with whom he traded on the stock exchange Mr. Wolff was already familiar with this through his telegraph Bureau, and so the "Neue Börsenzeitung" was allowed to its trial issue of 15 November 1871 the "National-newspaper" as a paper that "separates its duties between the concern for the German Reich and the considerations for the stock exchange's premium profit." Mr. Schweitzer, the former clerk, knew how to change the tone of doctrinal pallor, which the "Nationalzeitung" was distinguished by, also on its to transfer stock exchange articles, thereby giving them a deeper His endlessly long weekdays reports are eternal repetitions, always contain the same meaningless or at least ambiguous torrent of words, and serve only to pull the wool over the audience's eyes. Of course, Mr. Schweitzer saw through the big scam perfect, but he was careful not to openly describe him as such. to mark it, because then the whole "business" would have been over. In No. 518 of the "Nat.-Ztg." of 4 November In August 1871 he wrote: "The claim of an unlimited Bullish sentiment is also counteracted by the fact that too high Prices derive the investment of capital. We do not enter for the startup fever, but we claim that the transformation of industrial enterprises into joint-stock companies create a diversion of capital to industrial areas

which from an economic point of view cannot file a complaint. The movement will once again Conclusion, but we must always repeat that the timing of the same cannot be assessed, nor can the final causes be predicted." – Still The following passage from No. 611 of the "Nat.-Ztg." is more amusing. of 30 December 1871: "We acknowledge that in the year 1871 Too much has happened in the area of start-ups, but This does not contradict the full justification of the statement: The capital power of Germany had been undermined appreciates; it developed at the same moment in full Maasse, in which the defeat of France and the Establishing peace on a firmer basis than has been the case for a long time Time had become indubitable. Despite this knowledge, we must also maintain today that

currently a certain over-speculation, overproduction or whatever you want to call it, exists." -- Is that not a delicious ragout of yes and no, of for and Against?! Of course, this babble is not decisive. What is crucial, however, is that Mr Schweitzer new companies recommended, even for the laziest and cheekiest, eg the famous "Society for Fund Speculation at the Hamburger Börse" (Heilbut) no energetic word of the defense and the warning that he would remove any advertisement that he handled him, took up editorially, and often enough, as eg in relation to the criminal "Lindenbauverein", false News spread, presented fictitious facts, which Thousands have lost their possessions.

With shame and pain, Dr. Zabel and his political ical staff, all men of honor and scientific education, on this pedantic activity, which they do not stop could, because Mr. Wolff supported Mr. Schweitzer, and several times they thought about leaving. Only love to the newspaper, which was a part of herself, held her back.

– 477 –

But Mr. Schweitzer suddenly became a rich man and bought a valuable house. Without a doubt it is a big Misunderstanding when Mr von Diest-Daber claims that Dr. Zabel would have told him that all his editors were from the stock exchange Zabel can only do this with reference to the employees of the stock market part.

Meanwhile, Mr. Lasker, who had been a permanent member of the worker of the "Nationalzeitung", with the owner of the the same great influence. If the modern Cato As early as 1872 in Parliament against the Actien and Founding mischief, it would have been more appropriate for him to have flow so that the "stock market back end" of the paper, on which he himself worked, was kept a little cleaner; but he only used it to glorify himself and his friends. Listen to the following sample of style, which In No. 232 of the "Nationalzeitung" of 21 May 1874 we find:

On New Years Day 1875, Dr. Zabel resigned from the management of the "National newspaper"; probably not entirely voluntarily, as one can see from the resigned farewell words. He kept still have a place in the editorial office, but immediately Then he lay down and died. He was with the "National newspaper" and he could not put it in the hands of another. His successor was Mr. Fr. Dernburg, a relatively unknown advocate of Semitic Origin from Darmstadt, but a protégé of the Lord Lasker. Even before the period of dizziness, the older excellent employees several have left; now the others also took their leave, so that Almost no one remained from the actual tribe. Even Karl Frenzel, the head of the arts section, intended, as it was said at the time, to take his dismissal.

Soon after Mr Dernburg came to power, Diest's "revelations" took place, after which the re-actors of the "Nationalzeitung" in an armed collective statement, which concluded with the following words:

"The purity of our faith, which has been so carelessly questioned, we simply put our names opposite:

and that he has the legal proof of this in the pocket. Instead of filing a defamation suit, several newspapers of the party itself are urging the "Nationalzeitung" hid behind the deceased whom she so "revered", Dr. Zabel, who allegedly ically "affected", and was content to pay for her Honesty a testimony of the founders HC Plaut, S. Abel jun. and Privy Councillor Ludwig Heise. The latter offered to "affirm under oath" that the Nationalzeitung "neither the Berlin-Dresden Railway or any other railway company has received anything other than the tariff moderate insertion fees". As a result of the storm that in the press, the "Nationalzeitung" found itself forced to make her Swiss available, whereupon He left with a statement in which he Among other things, he assured: "I was one of the first to supported by careful observation of all conditions, on the inevitable consequences of the founding period who viewed the subsequent crisis as inevitable. and calmly described its development. The share of booty taken by the founders and stockbrokers received the press. Not only houses of first Ranges, such as S. In September 1875, a number of Berliners and foreign newspapers and founded, in the sole interest of the public to provide the advertiser with "complete impartiality possibility" to recommend the most suitable leaves, the Central Advertisements - Bureau. The first chairman was Dr. Ferdinand Salomon from the "Nationalzeitung" and B. Brigl from the "Tribune", in whose place E. Pindter of the "Nord- German General". He also resigned, and the board changed constantly, as disputes and Disagreement arose, now this, now that paper was replaced by

From that, what is happening in Europe, the stock market is usually better and more likely to be taught than even diplomats and ministers. Important telegraphic dispatches are received by the stock exchange much earlier than the Newspapers whose subscriptions are not significant at all. Such news, such as the report of the fall of the Grand Vizier Midhat, have long been exploited by the stock market – escomptirt, as the technical term goes – before the press and the public have an idea of this. And the stock market themselves are not served equally, but rather. There is a multiple downgrade. The governing bank houses are always the first to be averted; after them the Dispatches communicated to second and third class houses, and Even later, the majority of speculators receive it. the dispatches of the telegraph bureaux on all lines jump before the private telegram; and likewise comes the new telegraph tariff of the German Reich, which Mr. Stephan

The A. Schaaffhausen'sche Bankverein in Cologne was represented in Parliament by Mr Mevissen, Baron by Diergardt and Overweg. In 1871, 12½, 1872 – 14 % Dividend. In 1873, when there was only 8%, the three Directors Victor Wendelstadt, Theodor Movius and Ernst King in royalties 75,000 thalers; the 14 supervisory board members pocketed a tip of about 110,000 thalers. For In 1874 the directors received only 45,000, for 1875 only 15,000 thalers, and the supervisory boards in this proportion. In 1876 the dividend was 0, and the price of the shares has fallen from once around 190 to around 60. The Silesian Bank

A so-called parliamentary foundation was the March 1870, the Preussische Central-Bodencredit-Actien-Society. The founders were: Baron Carl von Roth-Schild in Frankfurt a. M., Baron Abraham von Oppenheim in Cologne, Commercial Councillors Gerson Bleichröder and Adolf Hansemann, Mayor Miquel; while the first verwaltungsräte, among others, the following parliamentarians are mentioned: Graf by Arnim-Boyzenburg, by Bernuth, by Bethmann-Hollweg on Runowo, from Wedell-Malchow, from Sängers-Grabowo, from Simpson-Georgenburg, von Kardorff, Count of Bocholtz-Niesen, Dr. Braun-Wiesbaden, Baron of Eckardstein-Proetzels (the latter as "auditor"). Lawyers have stated that the Society with quite extraordinary, downright illegal privileges; there is no doubt that that due to these privileges, the shares immediately become Agiotage of the worst kind was carried out, doubly offensive because it is a blatant contradiction to the actual purposes of this institute. Instead of transferring the capital to 4,800,000 thalers, 12 million thalers were spent thrown, but only 40 percent interim notes were issued, which still exist today and will probably never be completed. These interim certificates were issued on June 24, 1870 to the Berlin Stock Exchange at 106–110, but were not and noted already on 29 June 123–127, what a Course of 157' /, –1671 /, . As JA Leisewitz, the author of "Julius of Tarentum",

Ludwig Bamberger also only wants one child into the world but this child was also a lion. He founded in February 1870 in conjunction with Adalbert Delbrück, H. Zwicker (Gebr. Sulzbach et al. – Deutsche Bank. All founders of the first rank, and a truly classic Foundation! Ludwig Bamberger wants, as he describes himself in the Correspondents of Mr Wehrenpfennig and Mr Rickert apologize “because of his experience in overseas business (!) but has all the advantages of the foundation still and enjoyed it with satisfaction. The first issue was 5 million Thaler, and the 40 percent interim notes were issued in the course of of the year 1871 to 125, which corresponds to a course of 162 The second issue took place at the end of 1871, before the old shares were fully paid up, and amounted to also 5 million thalers. This time the noble souls were content with half of the young shares, and since the price of the old ones was about 115, This time they only earned about 375,000 thalers. In 1875 the exchange rate fell the full share to almost 70, and the bank would have, since it was after the Krach found little more to do, also already liquidated, would be

they are not from the government to which they belong through Delbrück, Leo and Co., with some “international” Business, sale of Chassepots, silver, etc. After the departure of Minister Delbrück, however, Mr. Pietsch, agent of Deutsche Bank in London, who is in full makes statements to the German Government regarding this silver sales, published a dry report in the “Reichsanzeiger” Denial. Recently, Deutsche Bank has been living mainly

mainly from the liquidation of Deutsche Union-Bank and of the Berliner Bankverein. In parliament she was represented by Ludwig Bamberger, Hardt, HH Meier, AG Mosle, Consul G. Müller, Overweg, Kapp and Dr. Georg Siemens. The latter, a young, until then completely unknown assessor and then Director of Deutsche Bank, was appointed by Bamberger's influence in the Reichstag. Mrs. Kapp was also at Berliner Bankverein and Deutsche Bank, because both foundations were under the hand of his patron, the Mr. Adalbert Delbrück. Delbrück, Leo & Co., still in 1867 mere agents of the life insurance company "Concordia", together with her cousin, the President ent of the Reich Chancellery, Carrière, were a large Bankhaus and have in the period of fraud a huge amount of Foundations, all of them by Mr. Adalbert Delbrück as a member of the supervisory board. As for Ludwig Bamberger, further foundations cannot be proven, However, the company Bamberger & Co. in Mainz, which he previously participated in various "creations", e.g. the "Deutsche Unionbank Mannheim", of blessed memory. S. Bleichröder and the Disconto-Gesellschaft are the first banking institutions in Berlin and among the first in the world, but both have also carried out the largest and bloodiest foundations, whereby they soon Walked hand in hand, soon like hostile brothers facing each other Nevertheless, Mr Gerson Bleichröder and Mr Adolf Hanseman was raised to the nobility in March 1872!

– 527 –

Bleichröder founded, among others: the United Kingdom and Laurahütte with 9 million Thaler shares (course once 275, now about 60); the German Imperial and Continental Railway construction company with 10 million Thaler shares, their 40 percent interim certificates at 115 each, ie actually à 137½ were introduced (Cours once 162 ½, now = 12 ½); the Posen-Kreuzburg Railway with 12 million Thaler Shares (without stock exchange price); and the Weimar-Gera Railway with 6'/, million Thaler, at 911, issued (course still approx. 40 and 15 respectively). In March 1873, shortly before the crash, Bleichröder, in association with the Berlin trading company, the Hibernia and Shamrock mines to 5,600,000 thalers Shares. The 50 percent interim certificates were issued at 130 which means a course of 160, and on the same Days driven to 150, which corresponds to a course of 200; which is why the stock market joke called the paper "Schamroth". Today The full share is quoted at about 25. Bleichröder's assistants at these Founders included the MP von Kardorff and Berlin city councillor Wilhelm Weber, formerly Ober-mayor of Gera; both excellent speakers at the General meetings of the companies concerned. Weber

also acts as "Office Chief and Procurist of Bleichröder. The tips for the King and Laura hut for the supervisory boards 1871/72 – 53,000 Thaler, in the In the following two years, however, about 200,000 thalers each; Hibernia and Shamrock were received by the Board of Directors in 1873 – 24,700 Thaler and 1874 – 15,000 Thaler; and even at the desolate Reich Railway Construction Company, where the revenues largely in "interest" on their own securities and in "Coursgeinnsten" existed, one did not shy away from pro 1873 to pay out approximately 50,000 thalers as royalties.

The Disconto-Gesellschaft founded, among other things, the Commerce to 1½ million Thaler shares, which were introduced at & 130 and then dropped to 60; the

Harzer Union mining and steel works with 2 million thalers Shares (price once 120, now 0); the Berzelius mine with 1,400,000 Thaler shares, introduced at 118–120 (Cours once 130, now 50); the Aachen Disconto-Gesellschaft with 2,000,000 Thaler shares, of which 40% are paid (Cours once equal to 150, now equal to 70); the Gelsenkirchen mining plant with 4½ million Thaler shares, introduced, with 50% payment a 118, so at the rate of 136, and driven to 175, which means a price of 250, while the full share today about 80. At the last meeting, the Supervisory Board in tips 1873 – 26,000 Thaler, 1874 – 28,000 thalers and in 1875 – 12,000 thalers.

November 1871, the Disconto-Gesellschaft gave birth to the Provinzial-Disconto-Gesellschaft, perhaps the most superfluous and most violent foundation of the entire fraudulent period. Instead of to establish branches and commanderies in the provinces, It has a subsidiary institute in the capital, but its directorate from the same persons as the administration of the parent institution, from Hansemann, Miquel and Salomonsohn, the business owners of the Disconto-Gesellschaft. Even the "National-newspaper", although she called the plan "rational", it was embarrassed as to how to define him, and kept a "definitive verdict". And it was precisely here that the most outrageous agiotage was carried out. The share capital was 10,000,000 Thaler and came in 40 percent interim notes to the stock exchange, which was introduced at 120, and which was still on the same day to 131, later to 150, which is a Course of 225. April 1872, 20% were still paid, and the course went up to 190. At that time, the 60 percent interim certificate 300 Thaler, while today about 60 thalers is still valid; and the exchange rate difference from then and now it is like 250 to 50!! The Provinzial-Disconto-

and trading cities, distributed 16% in dividends per 1872, and big tips for management and board members.

The only acquisition of significance was the purchase of the bank business of MJ Frensdorff in Hanover, but especially at She lost this through daring speculation of the previous owner, who retained the management, in 1873 the enormous sum of 772,000 thalers. The public has participated in this unique The company lost about 11 million thalers.

An even bloodier foundation was the Dortmund Union. It was welded together in February 1872 from the Dortmunder Hütte and other components of the Strausberg'-inheritance, which was allegedly increased by 6 million thalers took over, and from the Heinrichshütte and Nova Scotia, which Mr. Hansemann sold to the shareholders for 5 million Thaler Later, more was purchased, and the Share capital increased to 13,200,000 thalers! In addition, Priorities, mortgages and other debts that together can also be estimated at around 12 million thalers!! "The company The Union's attempt to take on the goal is almost unprecedented!" said the Prospect with naive sincerity. For the period From 1 January 1872 to 1 July 1873, 12% dividend was paid and for the Supervisory Board a tip of 141,500 Thaler, of which he only took half; the other half was left He left it to the Workers' Fund. But the next year, a loss of almost 2 million thalers. The 110 and pushed up to 228 shares are still quoted at 3, but are in reality worthless, since the property has long been no longer covers the debts. "The 'Adolf von Hanseman' has drowned!" was reported in August 1876 from Dortmund-mouth, and this is also the fate of society. The Shareholders lost 28–30 million thalers on the course!

In January 1872, shares worth 34,000,000 French francs were issued in 40 percent interim certificates, and gradually bonds 48 million Frchs., whose rate has since risen to 4 (for paid-in 60% of the shares) and 49 (for the fully paid bonds) Probably the whole company, to which Germany made a subsidy of 20,000,000 Fres. contributes, bankrupt, because it turns out that the Expenses, other than the originally estimated 187,000,000 Fres. still require about 150,000,000 francs! The founders have savings that can be achieved during construction should turn out to be generous in favour of the shareholders and issued them profit participation certificates instead!

With the formation of the Ru-

The Disconto-Gesellschaft joined the German Railway Company the Strausberg inheritance, and this happened Founded mainly to protect the noble co-concessions of the Miracle Doctor: Duke of Ratibor, Duke of Ujest and Count Lehndorff. Strausberg had in total 65,875,000 Thaler $7\frac{1}{2}$ percent bonds issued, but the coupon due on New Year's Day 1871 was no longer redeemed. Mass Liable claims, initially for interest, later also for of the capital, were to the detriment of Strausberg decided, and his noble comrades were threatened with impoverishment. "Protection committees" were formed under the leadership of Mr. Georg Davidsohn from the "Berliner Börsencourier" and Mr. Oscar Freund from the "Breslauer Handelsblatt"; and it united Bleichröder and Disconto-Gesellschaft the defrauded bond owner of a stock corporation whose supervisory board includes, among others, Miquel, Justice Counsels Wiener and Riem and Attorney Wölfel 52,000,000 Thaler bonds were converted into shares and thus "saved German capital", the gentlemen Hanse-mann and Bleichröder were rewarded with nobility. Disconto-Gesellschaft has always strived to respected businessmen, high-ranking officials and parliamentarians ment members. The board of directors consisted of among others: Georg Reimer, Moritz Reichenheim, Walter Bauendahl, Meyer Goldschmidt, FC Winckelmann, JGL Schäffer, Julius Kauffmann, all in Berlin, Richard Hartmann in Chemnitz, Wilhelm Puscher in Nuremberg; furthermore the Geh. Ober-Financial Advisors Scheele, Wilckens and Scheller, Government rath Dr. Reinhard, the Real Privy Councillors Wehrmann and Schuhmann; in parliament she was represented by Hardt, Wilckens, Baron of Diergardt, of Bernuth, of Rönne, Baron Ernst von Eckardstein-Proetz, Miquel; and in Berliner magistrate by Wilckens, who was also considered insolvent In her special service were Scheele, Wilckens, Miquel and Reinhard; the latter formerly Saxony-Weimar Government Commissioner and Supervisory Board of the famous Thüringer Bankverein. Central-Bodencredit-AG, Provinzial-Disconto, Romanian Railway AG, Dortmunder Union etc., partly as co-founders and partly as supervisory board members; and through The Disconto-Gesellschaft controlled a large network of railways, such as those in the Board of Directors of the Berlin-Potsdamer, the Märkisch-Posener, the Halle-Sorau-Guben, the Berlin-Görlitzer, the Magdeburg-Halberstädter, the Brunswick, the Rhein-Nahe, the Bergisch-Märkische, the Hessian Ludwig Railway, the St. Gotthard Railway, etc. Mr Scheele left the Disconto-Gesellschaft and with it about 60,000 Thaler annual revenue and was elected president denten of the Reich Railway Office with a salary of about 5000 Thaler appoint, as such, set the highly untimely increase of rail freight rates, reported this positive event telegraphically to the delegates meeting in Düsseldorf. Meeting of the German Trade Day, and returned immediately back into the arms and to the flesh pots of the discount Society. Even more than Bleichröder, the Disconto-Gesellschaft a major political power in the New German Empire, and it is the real stronghold of Manchester national liberalism. In one of the discussions conto-Gesellschaft belonging house, as several times without

Contradiction was claimed for the National Liberal Party established its own office, and from here the Voters across the country with leaflets and brochures bombarded, the provincial press supplied with correspondence.

Under the aegis of their high-ranking influential Board of Directors, the Disconto-Gesellschaft committed its terrible financial foundations, she ran a premium-making business that Others far exceed. During the dizzy period she increased their capital from 10 to 20 million thalers, and gave the young Shares at a price of 110 to 150, so that they alone at This operation generated a total premium of 4,300,000 thalers. As with Vereinsbank Quistorp, you can also

easily prove from the Disconto company that they have Dividends from 1870 to 1873 largely came from that horrendous premium, i.e. from the pockets of the shareholders paid, and that their actual income from the Agiotage and Gründerei. It had been in existence from 1866 to 1869 only 8–9%, dividend paid, distributed in the fraudulent period from 1870 to 1873 – 13, 24, 27 and 14% respectively, per In 1875, however, it was only 7%. Likewise, its shares, which were until 354, before the dizziness a higher Cours than today; in 1869 they were quoted about 140, currently only still about 100, and they will probably go below par, The Disconto-Gesellschaft is often and rightly associated with the Oester-Reichische Creditanstalt. Like this, They are also a main playing paper of the stock market jobbers, and already that characterizes them. The securities of the stock exchanges are always questionable, highly questionable nature, which for example Prussian Bodencredit-Actien-Bank Jachmann, Laurahütte, Dortmunder Union have blatantly demonstrated.

But the Disconto company knew how to reward itself themselves and their assistants. The four business owners Hanse-mann, Miquel, Salomonsohn and Emil Hecker moved to Times 1870 – 265,000 Thaler, 1871 – 702,000 Thaler, 1872 – 982,000 Thaler, 1873 – 519,000 Thaler, together in these 4 years – 2,468,000 Thaler. The 15 supervisory board members received in the same period 53,000, 140,000, 196,000 and 106,000 thalers respectively, together 495,000 Thaler, so that on average for every head per year 8250 Thaler or a ministerial salary. And for this Arch- and General-Founder stepped forward with true Passion Mr. Lasker, who in early 1875 had once again declared "war to the death" on the founders.

- 537 -

He now suspected and insulted the accusers and established the "slander era". Let us look at the deeds and the speeches of this honorable man in context.

Lasker's "revelations", on February 7, 1873, were in primarily against a political man he greatly feared. opponent, Privy Counsellor Wagener, who at that time the presentation to the king, and which he received through his "revelations". The material for this had been a former subordinate of Wagener, the calculator Pelckmann, delivered, which as a result of this "gross breach of trust" (see Nationalzeitung No. 274 of 16 June 1874), and later sentenced to one year for "disloyalty and embezzlement" prison. Lasker's "revelations", which were only a few conservative founders were, like his later behavior, a brash comedy about the Attention from the "liberal" founders and from his Jewish co-religionists. At that time, the A letter from the Prime Minister was read out in the House of Representatives, in which it was stated, among other things: "..... a large local company, with whom Mr Lasker has relations as a lawyer Should." This assumption was, as it turned out, turned out to be completely correct, but Count Roon felt prompted them to return immediately after the letter was read out. This claim is officially refuted in the report of the Special Commission on the investigation of the railway concessions system, Annex D., where It is documented that he has provided evidence many times remained guilty of making factually unfounded allegations and has only insufficient knowledge of the Act Perhaps for these reasons, the report remained the Investigation Commission for years, it remained even unknown to most MPs, so that when he in the spring of 1876 finally came up for discussion, again had to be printed. Nevertheless, Lasker had the noble The audacity to say in the session on March 29, 1876: "The Report is about three and a half years ready and in the hands of the audience."

A whole series of twists, turns and Mr. von Diest has told the modern Cato gross untruths to whom he promised with mouth and hand, also to take action against the liberal founders. He wanted to create a Diest's recommended letter, which he wrote in his own hand, in the answered in the most direct manner and recommended, afterwards He explained to Mr von Diest to have rejected it forever in November 1875, whereupon he wrote a very friendly letter published, which Lasker sent to him on 20 January 1876 Lasker had to endure a sharp rebuke from his former principal, Elisamter, in whose Redaction he worked in 1857. If Freemasonry brings no honour to its members, perhaps Lord James V of Freemasonry meant honor by promoting it through his great name gilded. It also happens that personalities, which in earlier times rose to the level of a public Name declaimed, but later again all gradually sink back into obscurity, often because of that because of loudly clearing your throat so as not to forget the T to hope that they are still alive. We still have other examples of this kind in Baden. – What then especially the designation concerns that the Mr. Jacob V. on the title his “brother in Christo”, I will assume that he is referring to the The name of the Lord is not abused for mockery, but that he is serious about this name. but this table of laws not only because it gives the world

Above all, there is no seriousness in the whole poem,
but only hypocrisy, for the table of the law transgresses
clumsily their own law. It is called
in it: "Be faithful to the laws of the state, in
which you live." Now it is an express law

The most precious thing is the nonsense about the Freemason=

stop fearing the Father, and love him and
just until he comes to the Confeription; after that
he should let go of love and the Lord
Papa only needs to be respected. But it is not said how
to accomplish this pedagogical feat,
and how the Freemason father should do it when he
has more than one son, such as the difficulty
to overcome if the son of $9\frac{1}{2}$ years the Ba-
ter only fear, and the one of $10\frac{1}{2}$ years only love him;
he would now have to assign everyone to a special time
and treat them especially, fear them every day
make the other person love you every day.

But if he only has four or five sons, then

the good brother Freemason would have to

a real balancing act between his sons.

Nor did the Table of Law say what would happen to the
daughters, whether they only keep their father until
respect or fear until the ninth year, because
they develop a little earlier. And in what position
should the worthy wife sit at the meeting=

Finally, it is noteworthy that even the Koran, the religious book of the Turks, is chrierly than this Masonic Gospel. In the Koran There is still talk of Jesus and with honor offer; but here there is no word about Jefus Christ, while he explicitly says: "No one comes to the Father, but through me" and: "Without me you cannot do anything (pleasing to God)." – Therefore it must also be described as intellectual theft that the few sentences of the Table of Laws, in which ical reason, taken from the Holy Scripture fare, and the Lord of the Holy Scripture is not at all is called.

But this table of laws is of interest to the Freemasons and their cousins very well. It turns out that also how it is with the understanding and the Christianthum of these misguided and confused people from

A, The horse's foot.

It is striking to some how even such Catholics May be Freemasons who still go to church and receive the holy sacraments themselves. The matter comes from the fact that the beginners, the brothers in the lower grades are told that everyone can have his religion retained. All worshipped the great world builder, May all be united in love for humanity; may fofever can believe what he wants. But the Freemasons have virtuous statutes, whose beautiful, noble= fensible sayings for princes, governments and one= wise brothers of the lower degrees are calculated, as e.g. the Masonic Table of Law. And they have secret statutes containing other principles and only communicated to those who are close to or are already completely finished with Christianity.

But even in the lower grades a

True paganism is closer to us than a narrow-minded Christianity." As is well known, the new sect of the so-called "free communities" not only the divinity of Christ, but some of these Churches are not far from complete God= denial. A preacher of this congregation and at the same time Freemason, named Giefe, explains in the Berliner Allg. Church newspaper (1847): "The ideas of the free communities are a kind of popularized freedom masonry=federation."

In the fourth volume of the Masonic journal Latomia it says: "Protestantism is in reli- göñöñ relationship only half, which the freedom- masonry is whole." The half consists in the fact that Protestantism some of the truths of faith of Catholic Church, but others still retains; the whole thing, however, consists in the fact that the freedom= Freemasonry in its deeper principle all revealed Truth. That is why the Freemasons

Christ never mentioned, neither in oath nor in prayer;

therefore the Masons are not counted according to Christ's birth, but as the Jews did after the creation of the world; That is why there is no Christian symbol in it.

One could now say: it is in many free= Masonic lodges have a Bible. Now with the Bible It is like the sword, which is also in many lodges. As the sword is only one It is a toy and never fought with it or shed blood is shed, so is the Bible for the Freemasons a game and not serious. We want a

But if Jews as well as Christians in the

by a completely different men's club, which in
several thousand branches across Europe and North=

The Vincentius clubs are also associated with the large
Catholic Church; they want to be faithful
active members of the Church; therefore they have
also the approval and blessing of the head

of the Church. The associations of the different countries in Europe also, like the Freemasons, stand together in connection and have a superior; only here is not, as with the Freemasons, to treason fear that all politics is excluded here, and only the practice of Christian love can honor God

35

Apart from the belly-serving, which is Freemasons diligently practiced, and from which the Vincentiusvereine know nothing, there is another big difference. Freemasonry talks about testing humanity and humanity *), but by doing so shows their decisive turning away from true Christianity, that they don't want to know anything about poor people; they are not accepted as members; however, after those, who have money and income or influence, for which they thirst, wags, fishes and wedges Freemasonry. The Vincentius Association, however, does not take the slightest consideration of rank and wealth; the poor citizen, even the journeyman, who wants to enter, just as much as the rich Merchant and the Baron or Count. Here is the Equality and fraternity, as Christianity wants and actually produces among Christians.

These Vincentian societies are where the Christian man of any rank may turn to it if he wants to do honest work for humanity and charity. – Here fine faith and fine religiosity perish not like in the Masonic hut, but grow and

*) What does the childish little dagger mean and the Playing with swords in the Masonic lodge? Is this a Symbol of charity and zeal to help humanity make you happy? Of course, it is not meant in such a bad way; Freemason=Philifter only wants to use the tools without danger of bravery and cling, and when he is "fired" has with strong powder" also flight shudders before he perceives himself as a bloodthirsty, terrible brother; the bold one!

becomes strong. Here, unlike Freemasonry, much money is wasted, and little or nothing for needs= suffering; what each Vincenz=member can give

can and likes, no penny will be spent on your own body, but everything only for works of mercy and kindness. |

Therefore, from a Christian point of view, one may ask questions: The character and activity of the free Masonry relates to character and activity of the Vincentius Association, like the fruit of the wild Kastania tree to the fruit of the true chestnut tree. It blooms with large red and white flowers bouquet; the fruit becomes large, the pod fleshy – But whoever eats those horse chestnuts will get vomiting and bad conditions. The blossom of the real chestnut blossoms, on the other hand, is colorless and modest, like the Blossom of the vine; the help of the fruit is thorny, but the fruit is extremely nutritious, healthy and pleasant.

It can therefore be said that in such cities, where at the same time a Masonic lodge and a Vincentius club, each man can see for himself how it is with his Christianity and its humanity, after he joins the ranks of the Freemasons, or whether he prefers to take part in the Vincentiusverein or not.

6. Freemasons and Jesuits.

I have through the compilation of the Vincentius associations with Freemasonry have shown how the charitable

31

The achievements of Freemasonry for humanity are far from soap bubbles of beautiful phrases about humanity, Love of humanity etc. exist, while the Vincentius associations. In truth, clubs do nothing else but good to the best of their ability, united, orderly and efficient. But I also want the method, the procedure of the Freemason in their affairs again through a comparison. Namely, everything bad, which trivial newspapers slanderously against Jesuit order and narrow-minded people easily credulously believe, will in truth nowhere more than with the Freemasons. It is said e.g., it is a Jesuit principle that the purpose justifies the means sanctify, that is, one may do something sinful to do, e.g. lie, cheat, in order to do something good. But it is the grossest slander to accuse Je-

suites, and in the many thousand books,
 which the Jesuits wrote, is nowhere to be found
 principle expressed; there is already a high
 Price has been set on it if someone has this reason-
 fet in any book written by Jesuits
 However, with the Freemasons this reason=
 fet is practiced, only with the difference that not only the
 The means, but also the end is unholy. The freedom=
 Mason Schubart writes to Baron von Hirschen
 (printed in the book "Cryptocatholicism by J.
 A. Stark): "Learn that I am almost

found." This wind and deception beseeches in ben verse
 with which the Freemasons men of Ver=
 may seek to attract talent or influence; furthermore, in
 the speeches of the World Architect and general men=
 flove, with which they see the destruction of Christianity
 and seek to cement the Christian conscience;
 furthermore in the immoral imposition by oath or
 Vows to bind oneself to superiors and laws
 listen to the newcomer who is entering Freemasonry
 fead can be recorded, hidden; furthermore in the
 Fables and the nonsense with which they describe the lying story
 to make the history of Freemasonry interesting and important
 fearch; furthermore, in the much talk of light,
 clarification and Orient, while in the Masonic lodge
 is aimed at more and more the true light
 of the Christian faith. (The enlightened
 Freemason brothers are therefore rightly called by Erich
 Servati (Sautter) was a night owl guild;

 but also devices whereby they artificially

 Charity, while the large amount of money that the
 Brothers at the reception and other occasions

 luxury and lavish feasting.

The Jesuits are also accused of
 all their actions and omissions only for the benefit of their
 Order. It is true that the Jesuit loves his order
 and is a sign that the Order is committed to the needs
 religiously active priest. But the task

and activity of the Order is none other than that, which the teaching Church has in general, namely all To mobilize forces to promote Catholic faith and Catholic lsisic life. The Je= fuitenorden is, however, particularly usefully organized firt to intervene efficiently and forcefully in the people and to work for the Catholic Church. He is equal= fam a guard regiment of the Catholic Church. Therefore= No one will be persecuted by the enemies of the Catholic Church and especially hated by the Freemasons and slandered, especially the Jesuits); and therefore zealous Catholic pastors are happy when they Mission or spiritual assistance to Jesuits can; they do not affect the secular priest, but but they provide him with effective support.

This very accusation, which is unjust What is done to the Jesuits affects the Freemasons to the fullest extent. They affect the entire citizen= fociety which does not join them or cannot join, such as the poorer tradespeople= man who does not pay 50 guilders admission fee Because the Freemason seeks work, earnings, Promotion only to the Freemason, so that the tradesman who is a Freemason, the customer= fociety of all Freemasons and also nor the customers of other people who do not know

to find out how this abolition works
ten has.

The first French revolution was prepared
by a number of men who believe in Christianity=

by the so-called encyclopaedists. These men
recognized that the most capable defenders of the
Christianity at that time were the Jesuits; therefore

a lot of small writings spread, which filled
were filled with slander and false accusations
against the Jesuits. Yes, money was even publicly
offered to those who write against the Jesuits.
In particular, a Catholic Church
apostate sect, the Janfenists, the Encyclopaedists
helped to incite against the Jesuits. The notorious
d'Alembert writes to the "beloved Antichrist" Voltaire:
"Let us not put any obstacles in the way of the Janfenist spiders=

then the powerful help of the unbelieving minister
Choiseul and the mistress of King Louis XV,
the wicked Pompadour; the latter was full of hatred against
the Jesuits, because one of them explained to them that he
could not give her absolution as long as she

strictly forbidden to defend the Jesuits; even the Archbishop of Paris was no longer safe there, when he praised the Jesuits in a pastoral letter;

and a Jesuit and a secular priest were hanged, because they embody the sacred law of Parliament namely the Jesuits had defended.) Even before this, the Jesuits had also been in Portugal. Here the already unfit King Joseph I. completely blinded and ruled by a wicked man, the Minister Pombal. He paid homage of the Enlightenment and exercised such a tyranny that the Prisons were no longer sufficient and over 9000 people sufficed by all classes, his hatred and greed were sacrificed. That a person who was completely clarifies, that is, is unbelieving, and everything right and just activity that sought to exterminate the Jesuits: is quite natural. Pombal frightened the king by that a party would oust him from the throne and Brother Don Pedro wanted to raise the Jesuits, the Jesuits were but friends of the same. Then he paid certain loose people, especially one because of debauchery ex-Capuchin, named Parisot, who was expelled from the Order, and an apostate Jesuit, Ibagnez, who insulted had to write writings against the Jesuits, and gave to read such to the king. He sent such writings ten also to all countries where Jesuits were, even to the emperor in China. When a Portuguese Herzog was tortured and without proper Trial was executed, allegedly for murder attempt against the king, Pombal used this Circumstance to gain some Jesuits' consent blame and suppress the entire order. He left the superiors and most distinguished members without

throw all the trial into horrible dungeons; the rest round up and transported helplessly to the shores of the Papal States in order, as he said, "to give St. Peter a gift." The King, who was as foolish as he was unfit, agreed to this.

In Spain, the previous King of Naples, Charles III, a Bourbon, came to the throne in 1759.

He had foreign ministers who, by force= effective regulations and raised taxes on the people
The angry crowd moved before the royal palace and demanded the release the minister. The king gave in, whereupon the people brought him a Vivat, but also to the Jesuits, who people from violent acts by persuading them= This circumstance was taken into account by the enemy which the Jesuits used to make the king believe make it clear that the Jesuits had instigated the uprising. But this was not enough, but Minister Aranda, who has the same views as the French Choifeul and the Portuguese Pombal, had a Package full of false letters that he had written himself and in which high treason against the king was contained, to the Jesuit College, and immediately afterwards, before the Jesuits had even read it, confiscated by the police. These letters He then presented it to the king, who was furious about everything that the wickedness of the Ministers suggested. The Jesuits were suddenly without any investigation throughout the kingdom like

Criminals arrested, all property confiscated stolen, packed onto ships, towed to Italy and forbidden under penalty of death to leave Spanish soil to enter. You have to go through a fate fen, like the Christians of the early days among the Gentiles.

In a similar way, a violent Gen Minifter in Naples and Sicily the Jesuits without deprived of all legal basis and expelled from the country. Then Pope Clement XIV (Ganganelli) formally= abolished the Jesuit Order. But he did not not done as a result of thorough investigation, but frightened and harassed by the princely courts; instead a rock-solid "non possumus" (we can't) To counteract this, the Pope announced the abolition of the Order against all ecclesiastical order, without trial and formal judgment. Pope Pius VII, on the other hand, cher did not even submit himself to the violent Napoleon J. re-established the Jesuit Order. What I have brought historical information about it here, is detailed and thoroughly demonstrated in the book by Dr. Riffel: The abolition of the Jesuit Order. Mainz 1855.

view of the many wonderful brothers with their wisdom-
signs of sheet metal and sheepskin. But the dying
and the funeral of the Commander-in-Chief of the
Freemasons without Christian symbols should be free-
mason, who still has real religion, is suspicious.
Some who are not yet completely familiar with the Christian religion
has disintegrated, thinks he can be a Freemason and a fellow
be a member of his church. That is completely incorrect. However,
some Freemasons go to confession and become ecclesiastical
buried, simply because the clergyman in question
does not know that he is a Freemason. If a Freemason
mason confesses, he either states that he is a freeman
mason free, or he does not state it. If he confesses such,
fo the confessor explains to him that he only has to give him the
absolution if he had freemasonry
completely, because there, openly or insidiously, the
Catholic faith is being undermined and because the Church,
to which every Catholic owes obedience, the freedom-
masons are punished with excommunication if they ftire-
fensibly remain there. But if the Freemason says nothing
of it in the confessional that he was hostile to this church
sect, he is concealing something that requires confession
belongs, and steals the absolution. This is given to him
therefore about as much suffice as if a Jew
had sneaked into the confessional and confessed his sins

PREFACE

The book Francs-Magons and Jews received from the public
 a home that the author was little surprised about. Sun
 unique but it was enough to attract attention and pro-
 take the exam for competent men on two

particular ideas that sheltered him from a
of great importance and of a surprising topicality.
A dependence on sacred exegetical expression; the other app-
participated in contemporary history. Malgré la
light spirit that we repeat in our century,
he found the number of readers who did not

On one of the most important points in history:
the action of the Jew in the Franco-Masonry and the

I conclude that I cannot express myself
very nice, in my book, my real
thought.

It is necessary to make some observations on
the text of these two letters before translation.

Between the Provençal text of the first letter, printed _
by Bouis, and this one reproduces I'Armana prou-
founded in 1880, there were slight differences in orthodontics

graphs which are completely indifferent to the senses.

Both Armana and Bouis are there for you; the first

This second letter has also been translated by the abbot

The mistakes of this translation of Bouis are easy to

see. In any case, it will not be without the use of the fair

true signification of this old text.

"De Republicas", meaning "des Republics",
in the Latin sense, it is a matter of public opinion,
of the State, of the government. In the text that says this
the greater republic.

The thought of the Jewish prince is therefore greatly at-

faiblie, so as not to say denatured, par la translation

de Bouis. She is clear and energetic in the original text-
ginal : do everything that you can imagine
children become lawyers and notaries, and therefore,
the means of these functions, they can be applied without
to put the head on the administration, on the di-
Department of Public Affairs, Department of State Affairs.

50 « And by this means you will dominate the Christians
and you gain your land. »

Here is the counter-sense formula. The text on the door: « Pa-
"raque, subjugating the Christians, gain earth."

What does that mean word to word: rather, subjugating
the Christians, in subjugating the Christians, in the met-
so also under your jog (who will arrive when, by the
through your functions as lawyers and notaries, your
children will be taken into the administration of the
public affairs, budget management), ganeis

6° « From what you are, you will be greatly educated. »

This translation is exact. The Armana proves but this also means: "Because she is, you are "maybe better than better", because you are, you will be much higher and more. It's good sense.

According to the phrase: « You arrive at the conclusion of the power », I seem to better render the figured shape and the most powerful concision of the Spanish text, which says mot à mot: « You come to be tense for some

chose, « in something ». In Spanish, that means "something" with its many significations, a particular sense lie which is a species of litho. It means something chose in the best possible way, of all. It is this meaning that the proverbial expression comes from: "something, o nothing », it says everything or nothing, or even more, like

translated from the Academy dictionary: « by Cesar, aut nihil », or the premier, or nobody. « Come on, be careful in something » must therefore be delivered literary by : you come to be tense for the first, or well, for everything: consequently you come to the conclusion of the sance (I).

Compare this Spanish text to our premiere
letter with the Provençal text copied by Bouis, we
immediately realize that one and the other are, how
in the general sense, absolutely identical.

By rapport aux expressions, if we retranchons
certain passages added on a side like the others,
we find that they are almost obvious, or
well that they do not consist of simple variants.
Even the Provençal text sheds two details that are not
pas the Spanish text: « What a new good lou
land of Provenance », who is the new master of the
Provence, and « the Arles, Aix and Marzeillo », these
d'Arles, d'Aix and Marseille. From his side, the text is-
pagnol women also have two details that do not stand out in

– 18 –
Provençal: "and we ask you to do well

ayuntamiento », and we supply you with good

take advice » », and now very briefly », the most important thing is sible.

Then the Provençal text like the Spanish text ending up asking for the opinion of the Jews of Constantinople, but with two phrases of different terms means all the same signification. « Send us... the deliberation that... we have done », send us the deliberation, the resolution that you accept, this the Spanish; "Tell us what you should do," tell us what we are going to do, this the provençal.

It's clear the same thing.

It must again be noted that, in the Provençal text, this are the Jews of Arles and Provence who write to those of Constantinople, which plagiarizes the King of France and of Provençaux, and that Chamor, the signatory, is quarrelled by the Rabbin of the Jews of Arles; but that, in the Spanish text, which the Jews of Spain wrote wind to those of Constantinople, which plagiarizes the king d'Spain and the Spanish, and that Chamor is apostrophized prince of the Jews of Spain. We explain more lose the reasons.

These differences are partly due to the fact that the two texts are identical, not only in terms of sense, but also in terms of aux expressions. We therefore consider them as reproducing, with some lighter variants, one primitive text.

The second letter, the reply of the Jews of Constantinople, nople, suit the premiere in the Silva Curiosa de Me-

Bouis. |

This second letter confirms our review of studies Jews, «IT COMPLETELY CONFORMS TO THE TEXT OF Bouts, less naturally reading and spelling errors commissioned by the histories of Arles ».

It is very important to note that: the answer of the Jews of Constantinople is written in Spanish, and she is, of all points, apparent in the two alone au- you already know that the premiers, a Navarrais, in the 16th century, the other French çais, in the dix-septième.

Drink this unique difference: in Bouis, this response is addressed to the Jews of Provence, and in Merdrano, in those Spanish.

Remember that detail that we provide to the Review of Jewish studies (p. 303): the manuscript copies of these two letters « forming » in Spain, where they are started to circulate « from the end of the 19th century onwards »; the National Library of Paris in possession three manuscripts, the writing is of the seventh century.

CHAPTER TWO.

AUTHENTICITY OF THE TWO JUVENILE LETTERS OF THE 15TH CENTURY.

The first question that concerns her-self,

after the lecture and study of these two curious pieces, is there; are they really authentic? sont-elles

| element and authors and the time that presumes the signatures and dates?

Many writers do not accept this authenticity. We expressly affirm that none of the systems imaginary subjects to support the negative in the background- quite seriously, because these letters contain all the intrinsic and extrinsic characters here We have to look at the facts as authentic.

From the outset, it is not possible to establish with this that clearly shows, not at what time, not by what apparently this correspondence had been made.

I. According to a first sentiment, Father Bouis will be the author of these letters. But this opinion is absolutely insustainable.

Car, this continues just M. Arsène Darmesteter, in the Review of Jewish Studies, "the wise writer does not to read the indigestible sentence aurait-it was capable to write this Spanish letter, if you live in love, are they nice and strong? And then comment and why gave him the idea of making the original in Spain-gnole ? The explanation is vague, superficial and inexact that the woman employed in this language in the document-monfere well that he ignores the real reason, that is all the first to be thrown away, and that by reason-what does it mean to simply transcribe an original which is under the eyes. Finally, this is not the case in the 15th century, in the full reign of Louis XIII, who had been singing to produce a document of this genre against the Jews;

Finally, this one is completely overlooked and closes the discussion, that is, the two letters exist, how many hours before that I went to the public. We venons to see that the Spanish Julien de Medrano les

it is therefore clear that Bouis is not the only one, |

manufactured to serve the arms of the churches-
tiques from Tolède favorable to the Jews.

This pretext has already been an order, known under the
name of "Cleaning Statute", in the name of

established clearly that we were of pure Spanish blood, and
that one would never descend from a converted Jewish family.
This "statute" would be a great help in retaining the era;
the soul of numerous recriminations and living

Therefore, after the most important historical events, the cardinal

So, in this opinion, our two Jewish letters
apparently written by an unknown Spanish author,
in the second half of the 18th century, at the time of
the order of the Cardinal of Toledo, to move
of the Jews.

M. Morel-Fatio expressed his sentiments on the reasons
following :

1. These two letters are identical, and then the book
de Bouis printed in 1644, and in the book of Medrano

This departure point of M. Morel-Fatio has not been done

This argument is therefore not valuable.

The next one at least again. I am surprised that

These thieves still save themselves in their nation, also good that in all countries, men and women frequently used animal names. We are knowledge of the Bible of the characters who appear layman : Caleb, dog; Zeb, wolf; Hazir, pork; Suzy, horse; Sephora, chicken; Rachel, brebis; Tabitha, cow; Eagle, cow, etc... And precisely Chamor or Hhamor, ane, is still one of these biblical names, and it is the name of a prince, the king of the Sichimites (2)!

The Chamorré and Chamorro signatures are not no risk in themselves. The Hebrew name Chamor a reçu, in Provence, the shape and the ending Provençales, Chamorré, and, in Spain, the shape and the Spanish termination, Chamorro. What this second word also has a meaning in this last language, and means tondu or pelé, this coincidence is absolutely fortunate; elle meet so confidently between different languages-

The intrinsic truths presented by M. Morel-Fatio in favor of his opinion n'ont done aucune solidité. Voyons si ses preuves extrinsèques are millions. fl it brought only one.

4, The presence of these two letters in the name wide Spanish, satirical and sardonic accounts, n'est point a motif that opposes what they want serious and authentic documents. she is even and very authentic, as she has known of the Spanish Christians, they are provoking their part a great shock, by comparing his teneur and his retentions with the state of embargo and the impunity where the Jews found refuge in 18th century. It's for this reason that it has passed in the records of curious and amusing poems. like tea moignage of the sombre organ of the Jews.

Mr. Morel-Fatio cannot therefore ask for reason-ment the presence of our two letters in the receipts of good words, against their serious character and their thenticity.

5. I add more that all the other circumstances outside in the sources of my honorable opponent place their production, turn against his sentiment.

After that, they seemed to have been composed in Spain, in the second half of the 19th century, probably Toccasion de I' « Statute of cleaning , by an An unknown person who wanted to be ridiculed by the Jews.

Or to these affirmations which are not pointless accompanied by suspects, confronting his data-toriques of the era assigned to the invention.

Admettons an instant that the two Jewish letters are It just seems like a farce and a joke. After your context, the object of pleasure may not be that ci: the embarrassment and boredom of the Spanish Jews, he-sitting between two equally unpleasant things for you, or lose your goods, or renounce your religion. The pleasure sea will be in the suggested solution by the author of Morceau: «You are well-rights of being confined for a while! eh! convert-so you appear! Before you save

On there is no universal point in these letters the Christians, as claimed by M. Morel-Fatio. Read Jewish families become Christians and their pro-Spanish architects would be particularly tough against a fact that is absolutely pleasant for us, and very compromising for their cause. Or, the According to M. Morel, this is not a question of this genre in the history of the era.

It is therefore necessary to rebuild it after the 16th century to find the material and the subject of the play health suppose in these letters.

So, not in the last years of the 15th century, not throughout the 19th century, one cannot meet de moment convenient whic place with honesty—knows the composition of a pleasure of this species.

6. Ecartons, by the way, a feasible hypothesis, but it has not been formulated by anyone yet: it is that Julien de Medrano himself would be the manufacturer of the pieces that were published.

It is quite clear that the previous reasons militant also against the presumption of a first-say to the name known, that against this of a false inconnu. Nothing more than others, Medrano could not song to combine a pleasure that never came reason, not about, of his time, and, at least that d'others, he had to have the idea and take the hair off composer and editor of two letters without interest and without gaieté, he who is available for but compiler of amusements and pleasant stories, destined to emanate "every conversation is polite and honest". In addition, it would be difficult to explain why and why the contemporary Medrano, where to buy his book, it would be imposing the fatigue of driving too many precise copies of these pieces prepared in advance

7. Finally, in his article, M. Morel-Fatio bring him even direct and temporary losses against his opinion; several passages by the authors which he calls the return journey by his base.

After that, three stories were reported, more or less long ago, the question of our two Jewish letters, MM. Castro. The Rios and Kayserling. These authors are émis on Cardinal Martinez Guizarro, or Siliceo, a assertion that renounces two parties distinct and divisible fort. In the first place, they say that these letters were written by the cardinal to say are "Cleaning Statute". With M. Morel-Fatio, we have repudiated this accusation which is not in her-even without a fair shake, and here the sailors are advanced by these stories without presuming anything.

But they confirmed in second place: Siliceo soutint that he had found the original of these letters in the archives of his church of Tolède, and his en circulation of very numerous copies. This affirmation is, without contest, perfectly separable from the pre-

mière. The two things she attributes to the cardinal can be very real historically, even that the first affirmation of the three-pronged approach is absolute-false light. Car. If we consider these two acts in Even so, they are nothing impossible, that is evident;

\

and if we have regard to the character and the situation of the cardinal at this time, they no longer know very assembleable. In effect, that is what they n'est certainly not the author of these letters, if est more likely, because it is in the conditions of human nature, that is, what is found in his archives, he was impressed by their donation advertising as widely as possible and saying high the place where it took the original price, because these pieces brought so much force to the reason behind-mental of his statute.

He already thought that the three authors were

In what but aurait-the mark with so of precision the origin of the discovery of these pieces, si was it controversial? On the other hand, he was good easy to check and verify by himself the directions and a copy of the Salamanca library.

Medrano's assertion sums up all the points celle de Bouis. Celui-ci says that the texts published in his story have been copied on a manual written in the archives of a famous abbey of Provence. his testimony was found to be applied by all authorities of these Bouis. Yes, in effect, a manuscript of our letters were found very clearly in the 16th century in the archives of an abbey in Provence, there is nothing impossible and unbelievable that there exists a pre-me in the archives of Tolède in the 16th century. par consequently, it was very easy to get to Medrano than Be careful, you have to make an exact copy by himself or by others. The affirmations sem- blable and disinterested by these two authors. publisher their works at a distance of a century are corroding mutually. |

Therefore we must wait for dismantled and absolute ment certainly the sincerity of Julien de Medrano and the accuracy of his note.

Or his words are formal and unambiguous: the letters were found in the archives of Tolède. Donc surely they exist for their time. in 1583, au hello.

We concede well without any doubt that this manuscript The archives of Tolède have not been deposited this year same as the impression of the curious Silva. He loved and have been quite remarkable for a while. But the death of Cardinal Siliceo, in 1557, at the apparition of la Silva In 1583 he was only 26 years old. This is only amenable to conclude that the manuscript of our letters de-

exists in the archives of the cardinal, and even before.

This conclusion becomes irrefutable by the assertion by Medrano. The library of Salamanca, assures - t-he found the manuscript of these letters "in cher- chant the antiquities of the kingdoms of Spain ». Assuré-

while this savant did not search for documents

antiques in contemporary pieces. Or, perhaps

26 years ago, the death of Siliceo was separated from

la Silva's impression, as the author's result, Medrano, and the search engine that informed him of the manuscript, contemporary of the cardinal. So this n'était certainly pas in the links be reported—either in those 26 years, or in the previous 11 years—Siliceo episcopate teeth, contemporary pieces for Medrano and the savant of Salamanca, who are search for historical antiques. Then I gave him the main on the manuscript of our two letters in fouillant and examiner of older documents, documents appearing at least during the era here preceded the cardinal's episcopate, consequently inside in 1646, and comprising the first half of century.

Therefore, the testimony of Medrano, author of the XVR' century, affirms and confirms the assertion of the three stories du xix®; therefore our two letters exist very surely—not in the archives of Tolède at least in the first half of the 14th century; so that's not the point in the second half of the same century that they were can be manufactured; So, at this point, the system M. Morel-Fatio completely broken neck.

From here we arrive at another conclusion victoriously opposed to the ideas of our honorable adverse.

How to explain the presence sensibly in the archives of The Toledo Church of these two letters, if they were not a faux, a pastiche, qu'a pleasant work of some Spanish moqueur

of the 15th century? Whoever entered, deposited and preserve in a certain place these apocryphal pieces and . badines?

At this time, in Spain, there was no point of proper civil archives, only laïques, as we have said today; everything was clerical and between the clergy's hands. In these church archives cathedrals do not penetrate that of serious pieces and authentic, or with good reputation, because this not that by the hand, or by the orders of the sheep, that the documents have been deleted. It is still exactly the same as our days for the archives of our ancestors. Or, I ask, which describes as unbelievable that the pastiche made by the newspaper plai-Saint-Pierre le Figaro, on December 10, 1881, announced a Gambetta's coup d'Etat, in a few years here, carefully collected by order of an French and deposited in the archives of his grandfather?... So, how about these two Jewish letters, that pretend to be a bit of a joke from the second half of the twentieth century, this pleasant pastiche which awoke circulated hand to hand and greatly amused the Spanish at the expense of the Jews, he could have been, before 1583, beautiful environment of this second half of the 16th century, very little by little after its composition, precisely and honorably placed in the archives of the great metropolitan church of Toledo?...It's a moral impossibility. So, on this simple induction, the logic would confirm that our two letters existing in these archives from the 18th century, they were prepared and considered as serious and authentic pieces.

– 45S –

But Julien de Medrano's testimony is trans-
This induction led to a certain conclusion. The

library of Salamanca, we say in our note,

that we have acquired the certificate of their authenticity and
they were made for serious documents.

So our two letters are not just a pastiche, nj

The sentiment of M. Morel-Fatio does not seem to support, but

see, at no point. The other opinions are not more solid, we have proven it. So it is not possible to establish with some honesty, not to whatever era, or by whatever means, this correspondence aura it was made. Therefore nothing valid can be objected to the authenticity of our two Jewish letters of the fifth century.

II.

We no longer have opponents before us.

We therefore now examine ourselves—me—with this Jewish correspondence, and watch our lecture all its intrinsic and extrinsic characteristics of authenticity. | |

I. If we consider it the same, this correspondence presents all the characteristics of the truth.

Its subject, form and form, is in complete agreement with the historical circumstances where it dates. verse

The protest of the Jews of France and Germany is trembling – bler for both the Jews of Spain and the Provence. They are under the threat of the same persecution, they must reduce for us a semi-final blable. Finding the closest ones to us others (because those from Italy are not yet in the quietude; The Popes have always protected and defended dus), the Jews of Provence and Spain are in concert between us. The letter of Rabbin Chamor is dated 1894 January 1489. The answer of the Jewish prince is from 21 November—since the same year. Dix months around s'écou—learn between these two letters. This time for us seems well long. But this interval is not explained haircut for this era. First of all, the letter d'Arles should part just on its date? And there is more detail while this day a boat leaves Marseille for the Orient? Between days the departure is done await? The delay could be long. From their side, the Jewish leaders cannot afford to be afraid of nir and de consulted the received letter. Enfin, general reason which is sufficient only to justify this interval of these months, it is that, in the 15th century, the correspondents Dances by sea, like by land, do not operate at all with the speed at which we are accustomed to our days. Bouis, in the 14th century, considers this interval as court: « Those of Constantinople, he says, toast response ».

among the dispersed Jews.

Since their dispersion, the Jews have been permanently

formed, among other peoples of the earth, a true and distinct nation, namely its supreme chief and his secondary magistrates.

This power was organized in such a way as to function ostensibly or secretly, according to the circumstances. After the ruins of Jerusalem and until today, the Jews have become more and more keen and have been led as an immense secret society.

Before their dispersion, they were exercised against this occult government genre. Car la secte des Zeles or Zélateurs, who became famous in Judaea, and who penetrated into all ranks of the nation, there was nothing vast political association, dissimulated care under a religious appearance. Pretexting a certain ardent for the Moïse law, it was very real by uniting all the Jews in a general effort against the Romaines. And in effect, from the age of 60 to 70, she organizes

and opposed to us resistance and revolt.

I am about to demonstrate the truth of my first statement for three distinct periods: 4° of dispersion in xlesième; 2° of xI° to xve, and 3° of xv° up to the era contemporary.

N

It is historically incontestable that, since their dispersion up to the 10th century, the Jews had a centre visible and sense of unity and direction.

In the ruins of Jerusalem 'by Titus (70), begins the first and greatest dispersion of Jews in the moon. The second is located near Adrien, after the made by Barchochébas (135). From this era, The Jews were definitively chased from Jerusalem and

of Palestine, and the whole nation is completely dispersed.

Those here, under Titus, escape on the sword, to flames and captivity, fleeing to various against Europe and Asia.

Let us direct you in the countries located in the south and to the west of the Judea, in different parties of the Roman Empire, especially in Egypt, in Italy and just-in Spain. These Jews called themselves Jews of Occidental dent. Their boss immediately stayed in Palestine, the more located in one or more of the two cities of Japhné and of Tiberias. It portrays the name of the Patriarch of Judea.

The stories also mention the establishment of these Jewish patriarchs. Less than the triumph of the Romans and the terrible vengeance that they exercise, it is a

Cached during the first times here Succeeding in the war, they repent and repent-rurent of what they foresaw of not having any more craindre. They are trying to rally in Judaism – more possible devastation to their nation, and still nir the exercise of their worship. The authority focuses on-turbulently in the hands of these wise men, and more especially from the one between you who chose to cook, and here we confuse the name of the Patriarch. His authority augmented to measure that increases the number and the resources of the Jews established in Palestine. To this group will soon be resolved, spiritually and politically-ment, all the Jewish emigrants in Egypt, in Italy, in Spain and other parties of the Roman Empire. The patriarchs exercise a very great power over you-torité. They decided on conscience and affairs cases important to the nation; they run the synagogues, like superior chefs; they established taxes; They called the officers “appointed” who por-received their orders from the Jews of the most re-culées, and who collected the tributes. The other part of the Jewish population, which left the Palestine

I reject the scriptural interpretation of the Talmud, which is false; we drink more water; but his testimony to existence and the authority of the Princes of Captivity preserves all its value. (1) The Jewish doctors and rabbis do not dare to
of the interim existence of this central authority in its
nation, to annihilate the power of the famous prophecy of Jacob in
regarding the Messie's situation and ultimately his accomplishment.

In Genesis (49-10), Jacob cries out: (No resurrection
sceptrum of Judah, and dux, of femore ejus, donec veniat hi-

of his posterity, to the extent that this one should be sent. »
We have seen better the interpretation and translation of

A necessary décolletage corolla. This is central torrential rain, since the nineteenth century, an authority completely ignored in his name and inconvenient as she is sitting, she is therefore exercising in a completely hidden way. Because when we I have already affirmed that the Jewish nation has been leading, since almost nine centuries, like an immense so-secret society. The story in effect is nothing more than that

Talmud: «The sceptre is not defiled in Judah: these are the « Echmalotarques, princes of the captivity in Babylon, who tien- "is the sceptre of Israel". In the second part of the text, the Talmud translated by a doctor, in the prince's place.

The sceptre is the external, visible and recognized symbol of authority royal, of sovereign authority; it cannot therefore be designed and pre-means an external, visible and contagious authority. Or none of these characters are not suitable for the authorities who are new and who are still the Jews, since their dispersion. The authority of the princes of Vexil to Babylone was not, however, a "shadow of authority", like Anne and Caiphe in Jerusalem, at the time of Jesus Christ. Something great that she felt morally and secretly-ment on the nation, externally and visibly, it was Herod, it was the Roman governors, it was the Caliphs of Babylon lonie here, of course, held the sceptre. A like the other era, the sword was taken from Judah; he was no longer in Judah. We believe that the Jewish Kings of Armenia have been descending songs by David. They have truly held the sceptre. But what do you think nothing contrary to the prophecy, because this sceptre returns to Judah, it has been around for seven hundred cents now. You remain, from a side the complete veil of external authority of the princes of exile passed away in the last century; d'an other side, the sceptre spread out from all the Jewish kingdoms of Asia, after their ruin in the 14th and 16th centuries, cles; consequently, since less than three cents, we have more of a sceptre in Judah: and the Messiah awaits the Jews in not yet naked. But, on the contrary, precisely to this first era, where, for the first time, the scent of Judah, passing by the princes of Asmoneen, descendant of this tribute, to the hands of the foreign Hero, !'Idumeen, the Messiah of Christians, Our Lord Jesus Christ, Sons of God and Sons of Our Lady, is born in this world and has been proved by her miracles

Of this prophetic text, the The result is that the Israelites have to be, over the long days, without royalty and without external royalty, visible and recognizable, gou- vernant, like all the rest of the nation, without a centre of direction and authority by name among men and women of all, as well as the other people in possession. The religious authority that the Rabbis and other chiefs know and incomprehensible, he rigorously excommunicates the Jews, and because they insist on doing so, it is absolutely nothing towards God and at the point of view of conscience. Ainsi This other terrible prediction follows in its entirety: « For a long time, Israel will be denied freedom God, without a priest (II Paralip. xv, 3).

What many writers say is that the Jews, since their dispersion, no longer a centre of authority, neither political nor religious greeux, therefore one must only hear from a visible and known centre, like among other peoples, and under the religious relationship of a truly legitimate authority. This one does not exist of making a central and supreme authority, but hidden, not Jews follow, and have always followed the religious direction and political.

movements of all nature are carried out in the centuries have passed into their nation, and without good also, with the other people. The stories have related the facts, without looking for the cause first, lack of precautions or external indications. According to this report, our two letters of 1489, in which we ap-

prenant the perpetual succession of these princes, are a precious revelation.

To make our thesis more and more obvious,
We remain to resolve two interesting questions which differs from the previous one, to know:
1° What a summer, and what is still today is tendencies of the authority of the princes and chiefs of Israel? We he had already qualified as absolute, sovereign, contested. Everything that we have related to facts and testimonies demonstrate well that she is en effect. But for the question of this authority should be completely lit, it is necessary to expose and its origin and the motifs for which it is based are respected by the entire Jewish nation. 2° By some means and the way these bosses take them to govern their people dispersed from one corner of the world to the other? source a summer. and this is what the organisation administrative and political which makes possible this government-universal mind?

We will study this double point in the two following sections.

IV.

The authority of the princes and supreme chiefs of Israel always summer, and is still our time, absolutely, uncontested and universally opposed, because eyes of all the Jews, she is nothing other than the Tan- is the Grand Sanhedrin.

I. What is truly the origin of the real date of its first commencements, the Sanhedrin, or Grand Council, existed before the Jews dispersion and siege in Jerusalem.

This assembly, political, religious and judicial, once, it was charged with all the important matters of the nation. She recruited herself and chose says its own members. His authority was immense. The great prince, who had made a part of the law, was Ordinarily the boss. It is she who is portaken to the last resort all causes grave jugées in the first instance by the lower courts. The Sanhedrin could inflict the death penalty (1).

(1) The Jewish coins of the two first centuries before Jesus-Christ and the first century of our time testify to this the great authority of the Sanhedrin and of his habitual chief, the grand prêtre.

Since Jean Hyrcan, son and successor of Simon Machabée (135-106 before Jesus Christ), the Jewish coins appear on the face this legend, surrounded by a crown of olives: Jean the great prêtre and the council of the Jews.

He then went on to say, "I am Judas Aristobulus, my son" (106-105).

- 91 -

The Sanhedrin is composed of seventeen and our members- bres, savoir: d'a president, in Hebrew Nasi or Náci, boss, prince, and seventy-four assessors. This memory not divided into three separate classes:

10 The Princes of the Priests: « Principes Sacerdotum . This general denomination does not mean alone- while the great prince in action and his predecessors still alive, but also the heads of the 4th sacred families.

20 Les Scribes: « Writers of the people », or doctors of the law. They formed a large corporation and powerful, because the ministry was very interested in inter-apply the Mosaic Law. Under the theocracy of the Jews, religion and politics find themselves in the dark-united states; also the writers were always

They carry, with the crown of olives: Judas the great prince and the Jewish Council.

One of the three types of coins that we left Alexandre Jannée, brother and successor of Aristobulus (105-78), reproduces the same inscription: Jonathan the great priest and the council of Jews. Regarding the coins of a second type, it is written in Hebrew: Jonathan the King, and in Greek: Alexandre (aged) the King.

Alexandre II, son of Alexandre Jannée, also planned his coins, the title of the King, in Greek: d'Alexandre, King.

The last coins of the Asmonean princes, Antigone

(40-37), depicted on the face, in Greek: the King Antigone, and on the lapel, in Hebrew: Mathathias the great priest and the great council of the Jew. This legendary Hebrew teaches us that Mathathias the Hebrew name of the Jewish prince here, in Greek, was Antigone.

Since the Christian era, we have found many coins that we reports on the era of the first Jewish revolt against the Romans (66-67), and here are these legends: Eléazar the great pré're ; Simon Nasi Israel, Simon, prince of Israel.

It is evident, according to this quotation, that the Juive-regions of Germany, in the year of the Christian era 1881, not different in any way, as regards their situation prior to the war, as far as their internal organisation and their administration autonome, of the middle-age ghetto (1).

So, you xvi? in our 19th century including the

The Israeli Alliance EGGS? is therefore, in first place, a Jewish new education centre, and, in itself, times, an auxiliary community; because it also opens his ranks among men of all races and all religions region. Because they are committed to supporting interests of the Jews who agree to be instructed by the merits, to submit his ideas and his influence, they devien-mentioned for him a particular species of « converts », which he regards and protects like brothers (1).

Therefore, thanks to the old and recent organisation of

the nation, not a single Jew of the universe, except the Jew sincerely convert to Catholicism, do not escape to the action and the immediate, or median, direction of central power of Israel.

Everything that we have established in this first paragraph 166 contains two evidential sentences:

4° It was without a beautiful brush and without long efforts that the great Jewish chiefs of our century are embodied successively all the secret societies, they were unified and placed under their domination.

The Jewish nation has been formed and led since less than a few cents, like a vast occult society, the families who supply the princes of Israel and their assessors have, through this exercise, in keeping with the traditional spirit of each race, acquire a consumption experience and a skill unique in this genre of governance and influence

mysterious to individuals and masses. Also the top Jewish leaders, because it was possible for them to put in regular contact with men of secret companies, they think they can arrive very quickly to gather them, and to maneuver with self-defence force of finesse.

In addition, these top bosses and these princes of the nation, a great name of other Jews were formed, they also, in the manner of qualities suitable for inaperture management of the population. Car the personal bosses of each synagogue and of each judiciary, sorts of small re-aristocratic and oligarchic publics, common seen, must be sorely obliged, especially for come and stay in power, especially for the governor-to their recalcitrant community, to act on a ma-kidney more or less worn out, and to put in movement of the more or less secret departments. The Princes de Judah therefore take hold of the head, which surpasses the occasions suitable for the users, men precious, perfectly trained in their role and all prepared to be solid and sturdy frames of n'im-doors of patent or occult associations. These are these men who have composed the first phalanges of Jews modernize.

Add the power of gold. Only the Jewish princes possessing golden veins that never burst. When these companies, Templar Masonry and the very, want to act outside their rooms and do any political or religious company, the gold devint absolutely necessary. I am convinced that the Grand Council which directs
all of Israel in our era, with a president, ndei, or
prince, to his head, is "composed and functioning, at little
chose now, like the times past, according to its traditions

A unique direction and command centre
it is constantly maintained among the Jews, since
their dispersion until our days. This authority sou-
veraine was exercised by the Supreme Princes of Israel,
assisted by a senior council, for continuation
of the old Sanhedrin. She continues to exercise
even, at the current time, in an absolute and in-

\$ II. – The Jewish leaders and the masses of the nation with
You have always believed in the domination of the world, and
Then in the 15th century, these princes had to follow in this but
to their people, unless it was possible, a plan that
is at the point of success.

At all times the Jewish people think to themselves that,
day, with triumphant power and glorious rain
you Messie, he became the leader of all the people
and dominated the universe. This idea and this hope
he appears from the interpretation of the prophecies of
sianiques, adopted and taught by the Synagogue elle-
same. This interpretation, true to the original, was
absolutely false, considering the circonstance of fashion and
of the era. That's why, when the real Messie,
the poor and humble Jesus of Nazareth, revendiqua this
title this mission, and present it with its truth
divines and his miracles for all riches, and with
his stupid ignorant fishermen for the whole army, the
organ and trumpet members of the Grand Council, chiefs
religious and political aspects of the Jewish nation, the Repoussé

put to death by the Romains.

We find the first indications written by the doctor-

Gation of disciples after the resurrection of the Sauveur:
"Sir, it is in this time that you will recover

It is evident that this woman, the believers, the disci-

The Messiah's future rain and his glory came

In the same year, another, German, also,

It is important to repeat these words by other analogues, also professed by the Jewish ears.

In 1861, the president of the Universal Israelite Alliance said, lawyer Crémieux, wrote in several of his discourse :

"Israel will not stop." This little boy, it's the

« The West must replace the double city of the Césars
« and the Popes (1). »

In 1864, a French Jew from Nancy, M. Lévy Bing,
wrote these:

© gene He would have closed since the first
« the last of our books (sacred and liturgical) is gone
"Chase the Jerusalem of our dreams!" And these aspirations,
« These thoughts are not even something intimate,

The reservations of M. Lévy Bing are not small,

contains some of the ideas which particularly appeal to M. Crémieux. The analysis:

The world's metropolis must regenerate (by the Jew) be in London, in Paris, in Rome, but Jerusalem, re-levée of its ruins, « a new Jerusalem », ap-pelée to great destinies, and who will be "at the time the « city of past and future (1) ».

We see, under a form or under another, all These Jewish boutons express the hope and expectation of the universal domination, physical or moral, of their race. These modernized Jews read like the Universe Israelites and M. Lévy Bing, who are Orthodox, are reformed Talmudists, the others are pure reformists, anti-Talmudistes et Progressives (2).

(1) Archives Israelites, XI, p. 495. 1868.

(2) On the question of the Messiah, the Jews of our day divided into two camps. For the anti-Talmudist Jews, the Messie is no longer a man, and his appearance will not be a mistake particular. Messie, for you, is a philosophical idea, which appears in Jacob's race, is the progressive idea and revolutionary who tried to break all religions, institutions and societies based on revelations, sacred books and positive and exclusive doctrines. The Messie venue is a philosophical era and all a set of events; it is the current era, our era of revolution and progress, head of the march the modernized Jew, and who prepares the complete triumph of his nation.

For the Jewish Talmudists, pure and reformed, the Messiah is always a real character, and his venue, like his triumph, a future special event. These faithful of the Talmud regard the current era, this philosophical era that we traverse—sons and among their brothers anti-Talmudistes, militants, etc., have a big part in the action and a call for revolutionnaire, like one of the stages that prepare the venue and the triomphe—very much desired by your Messie. II.

But, in addition, our Jewish letters of 1489 give us four-
there is a new and inattentive light on the
thoughts of Israel.

From the 15th century onwards, the Jewish princes
they are more willing to wait and see; they have
formally wanted to act. They have conceived a plan of
walk in the pattern of transforming their lengths
expectations in reality; they imposed on all their
nation, here, sitôt that times have offered the opportunity
properly, faithfully and persistently executed.

The simple reading of the letter from Prince of Constantine
tinople proves that it renferme the trace of a
conducting line nice and clear.
But this line of conduct is not limited to one case

particular; it is not local, to say the least, and not see that the only Spanish and Provençal Jews sax. It is evident, by context, that 'this letter give a general direction, applicable to the Jews of all countries and all times, then the result to obtain is universal: «Put the Christians under the joug... », « parvenir. by virtue of the power, and « rule the world ». Because this is what it is, It is evidently necessary that all the Jews of the moon-to take the part and summarize the efforts common, identical and persevering in the same sens.

Therefore this letter escapes us, not only the pre-

- 157 -

permanent sense of the idea of universal domination in the spirit of the Jewish princes, but more than life, of a certain plan conceived by us to realize your secular ambitions.

The princes of Judah came and formed this plan before

the 15th century? They were asked to apply in the previous centuries? I don't know. But it is sure that, during all ages, and since the 18th century 18th century, when our Western societies had serve a certain degree of Christianity, the Jews do not they don't take them in, they don't throw them away. We are finding some-us, here and there, who take up positions educated, or who are considered to be at the cause of their talents, at the expense of their extraordinary wealth, but the action is absolutely zero, as far as the difference fusion and influence of their ideas.

To ensure that your ambitious projects succeed» He failed to convince the Jews, always, that his plan of action had well and gently formulated, then an energetic and sagace direction, a complete and persistent obéis-sance to their bosses, and finally the circumstances favora-bles. They told you all these things.

We must agree that the routing line should be Jews are the most skilled. In vain and in an acclimatizing manner with a lens, in need of a subtle conversion cover, tou-these important positions and all the living forces of Christian Nations, Commerce and Finance, Magic treasury and barrage, management of public affairs

and privately, the Jews were forced to arrive infallibly, in a short time, to hold everything between your hands and to completely dominate all these people.

– 158 –

The Jewish prince here wrote this letter of 1489, or not import what its predecessors imagined plan certainly gave you genius inspiration. He admired the resources of his race, orgueilleuse, tenace, vindicative. intelligent and pro-living among all other human races, wonderfully done by consistently among all reports to accept, operate and maintain the application of this plan and the realization of these designs.

That's when. him and his successors have done well and tighten with secure tool that they use, that they knew it perfectly and was well organized nisé, as we have proven, for an easy direction.

The history of a past that has been somewhat lost, that of a present lamentable and full of menaces for a near-nir, demonstrating that the Jews are universally caught and adopted the ideas of their bosses.

However, it was not possible to conclude that all

the indistinct Jews, Talmudists and modernists of

all degrees in the social school are complete in the current of actions and gestures, projects and trauma, and the deeply mysterious politics of your supreme princes. At a certain moment, the nation to the reception, and it was received without any delay at other, a powerful impulse that changes the shape, is of general orders or specific prescriptions, be it defence or advice, and here; partner of senior managers, he has been informed, on all points of the globe, by its interim and immediate chiefs-diets. This impulse last summer is still today d'autant more docilely accepted and faithfully followed

– 159 –

by the Jews that she agrees perfectly with their secular aspirations and that it leads to incontestable and extraordinary successes. They are therefore put, and set yourself to execute, and continue to execute the plans of their bosses with a loyalty, a perseverance and a surprising ability, without having to need anything know in their ideas, their drawings and their voices. Can he must necessarily arrive, as the Jewish author observes judiciously. etc., that there really is "a big difference... between this "What exists and say is the community of Jews, and the secret « think of the chiefs and masters of the mysteries of the « judiciary (1). »

I'm going to say more: it's possible, it's even conceivable that the near totalitarianism of the Jews was also known not the members of the Grand Council, and again at least his president, prince sovereign of all Israel; and even the biggest number ignores existence of these great characters and one thing absolutely nothing and does not hurt at all in the way that the nation is governed. You will be nicely surprised by your affirming that there are other authorities above heads of their judges or rabbis and grand Rabbis of their synagogues.

The reason for this is that the people The Jew has been around for centuries, like a society secret. We know that in the French-Masonry, generally in the occult associations, the community the members do not know that their immediate bosses and not in relations with each other alone, without saying goodbye,

well sane, or at least without stopping to think that there may be others. Those who save, and who are looking for more long, possessing degrees educated; They are little known and they preserve a secret absolu à l'égard des chefs supérieurs. It is

Even in the Jewish nation, the big bosses are

be too rigorous to keep you inconvenient.

This situation can be produced even outside of secret societies. The summer experience was made in our

proper country and in the Catholic Church. There is a quarantine for years under the Gallic regime, the thought and name of the Sovereign Pontiff was quite evocative of the spirit of simple, faithful people, the majority does not pay any attention to the role, not to the need for baptism in the Church, and pen-said to be afraid that there was a Pope. For you, the only ones Existing and indispensable leaders in the government spiritually, it was the witch and the cure.

The ignorance of the great majority of Jews in the East of their supreme chiefs and the government of their nation was therefore not bombarded, nor was it contrary-

gate with their star and their perseverance to pour -

the execution of the duties of these bosses, when they are presented the appropriate occasions. |

These occasions, we say, were well favorable. |

Protestantism, the upheavals of society chrétienne, the shelter and the mask of the Masonry and of other secret societies, have potentially helped the Jew in his work. For France in particular, our successive revolutions, our progress in Virréli-region, indifference, incapacity and complexity of our

- 161 -

governments, have been procured by the Jews, primarily in the nineteenth century, the greatest facilities to penetrate absolutely, remove everything, even without hypo-a mandatory crisis, and without being foreseeable.

And they say, the inattention and insult of the Catholic what Christians are open to all Israel the possible entries.

But at the beginning of the nineteenth century,

after the intellectual and moral orgies of the great

Revolution, it is well placed to monitor the menaces
the Jewish people, at least after the warnings
that authorized voices made data available to the company
European.

Mr. de Bonald, who sought to justify the regime under

« gers, surely, has served its wealthy to acquire
« a great influence in the popular elections,

"and certainly serve their influence to acquire DE
« NEW RICHES (4). »

It is not the letter that we are travelling from
eyes? It does not mean that these lines are the
summarized by a contemporary journalist, from our
political elections since a decade?

In 1831, a Christian association protecting the
Jews, disappeared in one of his reports, and here they are at the address
of all Christianity: |

Few people know that if the Jews do not come

1489 accompanied by a letter, as we have in our
apparently today; he is no longer there, he is not
contestant: the fact is that which imposes. It is enough to
repeat what he says, operate and see.

III.

Take a look, from one side, the prince's program
de Judah in his main points, and, of the others, the
situation of the Jews at the current time.

In the 15th century, 1489, the prince of the nation wrote
Constantinople on the subjects of Provence and Spain

« Make your children MARCHANDS, little by little

« Make sure your children are LAWYERS AND
« NOTARIES AND THAT THEY ALWAYS HAVE AFFAIRS
« THE STATE, therefore, in meeting THE CHRISTIANS UNDER

In the 19th century, many journalists stated
the situation in Israel.

In terms of commercial and financial reporting, they are un-

a very interesting work published by the Revue des études juives,
1880, no. 2, and 1881, nos. 4 and 5, entitled: The controversy of 1240 on
the Talmud, signed Isidore Loeb.

(1) Here is where the origin of this PE ESA comes from after this
who reports the manuscript Hetractations of the Talmud in the Pro-
logue in secundam partem. Verse 1236, a Jew from La Rochelle,
named Nicolas Donin, embraces Christianity. It was a
very savant Hebrew. According to his coreligionists, he had
without any knowledge of the Hebrew language
new converts doors, in 1239, towards the Pope, an accusation

in rule against the Talmud. Gregory IX, then reigning, addressed of the bulls of the Kings and Horses of France, d'Angleterre, de Castille de Léon, etc., bearing the copies of the Talmud. He had absolutely no intention of conducting an open investigation on the subject. As a result of these orders, he was at Paris in the year 1240. between Nicolas Donin and four of the most savant Rabbis of the époque—that is, a long and serious discussion, and the next step is The Talmud was condemned and the copies burned publicly. (V. the Review of the Young City's Highest.) M. Isidore Loeb pretends that Nicolas Donin collaborated with the work Extractions de Talmut.

I allow myself to report here to Mr. Isidore Loeb an amusing distraction which escaped in its article titled : Bulls iné—quotations from the Popes, no. 1, of the Review of Jewish Studies, p. 118. I'll cite three pontifical bullets which invalidate the cross. The third is Report on the transformation in the Jewish Synagogue Church d'Orléans, orderly transformation by Philippe Auguste, after their expulsion, in 1182, and confirmed by Pope Celestine III. In this confirmation bulletin, the Pope made an allusion to Psalm 76, verse 11 (Hebrews, 77, v. 11): He mutatio Right Excelsi, it is a change of the right of the Tres-Haut,

We don't understand this book, they say; the Talmud differed from their times and their countries; they and overcome the fears and fears. Very conscious of the words that we repeat to these doctors are not data by you as the prescriptions or the prescripts-tionsdurables. This is the beginning of a crisis of indignation that they smother the Romans in their arms brothers. According to the Talmudical laws concerning the goim, such as, for example, the 19th Benediction, which is ceased, after several centuries, to have a sense for the Jews; they were preserved by force of habit, out of respect for tradition. They have been reproduced in the writings of the rabbis of middle age, what, de- and for a long time, they were considered as Tom-bees in despair. There are some Jewish doctors here, middle age, teaching the maxims of humanity and tolerance opposed to that of the Talmud. The word goim, that Rather be by Christians. I don't like this meaning in the Talmud; he means peace only. This is of Jewish apostates and sinners who have given Faust-Christians' sense of this expression is that also trumpeted those who were crosses. Judaism has come to always a high school of religion and morals; without this, he had succeeded a thousand times without losing cution.

We want to put science into practice rabbinical of the modern defenders of the Talmud. Corn they appear very late to us the meaning of the code religious and political of their nation, even though of the savants of all ages, of all countries and of the Jewish race Even so, we have exposed the true meaning of its teachings and his recipes. Saint Jerome, the

We has reproduced their words. Of plus, all, writers of middle age and contemporary authors, assuring that, of their time, the prescriptions of the Talmud were seized and practiced rigorously in all places by the Jews. What is it that some Rabbis are exposing a doctrine less inhumane than that of the Talmud, the

de combat. The Jews are revolutionary in the
three people, and against other people, before all
against the Christian people. This attitude and this
reaction they are inspired by their bosses and by their
doctors. | |

We had a difficult idea up to the point where
Jewish doctors confront revolutionary republicans
in their writings. With particular merit in being signaled
the famous Rabbin of the 15th century, we have already
said the Jew Abrabanel. This doctor, minister under
several Christian kings, it was an exalted republic,
a radical force, an enemy of the kings,
accusing all its forces against the government
monarch and representative as the worst
that men don't have to choose. |

"His opinions on this subject, says Count Beugnot,
"They are quite exclusive, quite outlandish, that is,

No surprise there when the Jewish nation,
in his ensemble, the forest, the desire for vengeance and

all imaginable plots against Christianity,
the monarchies and Christian societies are secure
sloppy, imprecise and incessant. `

The Jew has always been in revolt, open or hidden, _

_ thirteen, and we can say throughout Europe, since thirteen years, this moral painting of the Jew opulently modernized is always very precise. It would not have improved.

Two famous political men, of the Jewish race, from France, the other side of the Atlantic, supplies us with the conduct of all their lives, the exact measure of what the lucky and high-ranking Jews who pose in conservators, ordinary font at the society's guard Christians who welcome and suffer at their ' head.

The first and foremost famous lawyer, Adolphe Crémieux, here, twice, sat by the masters of the destinies of France, in 1848 and 1870, and who became president of) Universal Israelite Alliance since 1859 until its death in 1880. All his life, this Jew is occupied with an activity promoting affairs, interests, complaints, disputes between his brothers of the race and his nation. He said and said, not only in France, but in Syria, in Romania, in Russia, in Algeria, etc., etc. And for the benefit of the Jewish people, well above his French nation, it exerted immense influence and enormous power of action that gave him his highest grades mason, his presidency of the Alliance israélite and his posts rose in the state. Creamy was, he said, like many other Jews of his genre. d'un com- very kind and friendly in our relations with the Catholics in general, and with the dignitaries of the Church in private.

The second is the Jew Disraëli, who became Lord Beaconsfield, and head of the conservation party in Angleterre. Of Journalists who did not suspect us have already become aware of the veritable sentiments of this Jew passed into Protestantism.

By his conversion, Benjamin Disraëli says the leaf

But Disraeli made a Jew in his heart. It does not dissimulate

« He has shown himself to be INVINCIBLE REPUTATION against the Europeans, 'It is said against the non-Jews' (No. 21 April 1881).

And, add the Review of the Catholic World (15 June 1881),

1. The divisions between the Jews are called Orthodox or Re-

also reformists and progressives here in France
Indeed, the modernized Jewish camp was agitated, towards the
environment of this century, there were no attacks of method

1869? The Jew evidently, the Jew modernized, by his
constant efforts, using powerful means of action –
don't dispose, the gold, the press, the franc-masonry and
its branches.

The modernized Jew is therefore ostensibly
head of the Revolution; he is the boss and the
director; the path to success is success. The publication

M. Kuhn for the reason that he stated « this advertisement

retention, displayed all the way up, to the bosses
de file du progrès, it is the turn of the Revolution and the
Anti-Christianism and the domination of financiers
Jews among the Christians of contemporary society;
but it becomes clear in its explanation: it takes a
effect for a cause.

"Our democrats" have not been humiliated at all

by the Jewish synodal motion; car already for a long time

The Jew modernized the dominions and directed them in the
revolutionary progress, in a hidden manner, by
Masonry has its secret societies. It is because it
became the absolute master in the world throughout the
associations and occult sects, which the Jew osé is

open as secret. It is also that the
Revolution, under the leadership of the Jew and the Jewish leadership, is on the way
of the secret societies and is due to arrive in May-
braid on the grand day of the company.

By the authority of the synod of 1869, these principles
moderns have therefore been accepted by the whole nation, and

- 234 -

are born for Israel as a second sacred code,
that modernized Jews and Talmudic Jews revive and
follow faithfully.

2. All modernised countries are united on this
rain. These principles make your Talmud special to you.
They regard and treat like their brothers all those
where the adoptive, the practical, the supporting, the
some races and religions that exist. All tenants
of these princes are the particular « converts » and
immediately modernized by the Jews.

The Talmudists also adopted, in their own way,
the partisans of modern principles. That is what these
princes have been received by all of Israel, some of the others
people who are listening and practicing are
censured are admitted into the synagogue, and are assimilated
to these foreign converts who ceased to be "
brutes » and the « men » who fell

Talmudists also recognized the partisans of these
modern principles such as « true converts to the
justice », like «the new brothers », that God
to surprise and "understand perfectly" that
certain Jews the value and the high destinies of the
nation. |

Usage instructions

Google is working in partnership with libraries to digitise works appearing in the public domain, also accessible to everyone. These books are in fact the property of each and every one of us. He is definitely embarking on a costly project. Consequently, and in view of the fact that there are no necessary provisions to prevent possible abuses which could result in the delivery of third parties, technical constraints relative to automated requirements.

We also ask you for:

+ Do not use commercial files We have designed the Google Book Search program for personal use. We therefore ask you to use only these personal files. They do not actually work in a commercial way, something but commercial.

+ Do not respond to automated requests Do not send any automated request that it is on the basis of searches concerning translation software, optical character recognition or any other domain. If you have significant quantities of texts, do not hesitate to contact us. We encourage the implementation of works and documents appearing in the public domain and cheerfully served to you.

+ Do not delete attribution The detailed Google content in each file is essential to inform you and allows you to access documents via the Google Book Search program in advance. Do not delete it in no case.

+ Remain in the legality that is the use that you make of the files, do not forget that it is your responsibility to watch out for the law. If a building is located in the American public domain, do not be averse to the other countries. The legal duration of the author's rights of a book varies from one country to another. The works whose use is authorized and those who do not are not. Don't believe that simply because Google Book searches mean that they can be used in a way that is not available all over the world. You expose yourself in cases of violation of copyright law which can be severe.

About the Google Book Search service

By favoring the search and access to a number of books available in many languages, not to mention the fact that it contributes to promoting cultural diversity through Google Book Search. In effect, the Google Book Search service allows internet users to discover the world's literary heritage, all while helping authors and

This Jewish constitution is in the canonical Books of Moses; everything later is not derived originally from God and is therefore considered as a more alien. This is not to be considered here. It is a the Jews and Jehovah as the worldly king of the Jews concluded contract to achieve external advantages. The Jews will enjoy well-being, prosperity, offspring and in particular the property of their neighbors if they follow the commandments of their God. If they do this, They will be punished with material losses and threatened with physical harm. That is why the Religious law simultaneously governs civil law and vice versa. State and church coincide, and whoever leaves the state He leaves the church at the same time. It is probably think that the Jews were forced to submit to a foreign, externally subjugate non-Jewish states, but it is impossible for them to voluntarily immerse themselves completely in it. The state is therefore not an abstraction of the

human society, but it is the expression of a People's personality. His profession is not to run an inn, but to be a home. It is subject to the all-common conditions of humanity, but also the special that of the nation. He has to develop the strength of his people, and this is only due to the peculiar features of the same
He can also fulfill his duty to protect of persons and property is not sufficient if he merely He wants to be judge and executioner. He needs school to to educate the minds of his people and religion, to support the moral feeling of the same. He can therefore a leadership of public education and a state religion cannot be avoided: both of course national, like the spirit and ideals of the people.

The folk custom and the feeling of natural togetherness hangs – the national feeling – are therefore the basis of People and state. But they are only possible with equal polite, not with a strangely thrown together population, and require institutions that protect the characteristics of the people and thereby bring about the state of affairs which we call political freedom

unity. This also requires unity of nationality and is only conceivable in such a case. An arbitrary scheme would see the state as a foreign oppressive mechanism and both the moral feeling disturb and dissolve the natural bond.

It is not given to the human mind to peculiarities of a people theoretically complete to grasp and formulate: they only expressed themselves practically

in history. Therefore, state institutions not be designed according to abstract rules, but are the practical needs and the natural development development from the people and its history And if this latter is to happen, then the organs of state development, regional and Communal representatives, state and municipal officials people, so that the nature of the same – the nation- nalitit – participates in them. Such a creation of the State institutions from the nature of the people, however, The latter, in turn, is the most important in its handling. The state must therefore be a natural unity and people and Officials feel that they belong together. This is the basis the instinctive hatred of foreign rule.

A people becomes paralyzed and corrupted when it is governed by its own peculiarity. Thus, the development development of civil liberties in France through crude and thoughtless crushing of all historical circumstances have long prevented England on the other hand, with wise and careful consideration the latter and saves from the political straitjacket an arbitrary and abstract codified legislation progressed naturally. The state decline of the German Empire dates from the aspirations of the German Emperor, to make it a Roman emperor, from the rule the Roman Church, whose dignitaries were German Reich princes, and from the introduction of Roman law by foreign-educated lawyers.

The whole of history teaches that unity of nations nality is necessary for the existence of a state and that States without such a system will perish because they lack lively popular consciousness is missing.

The Romans had, through strict training of the national

could be assimilated, the Roman Empire ceased to be a state and became a mere country complex, which carried the seeds of decay within it. But the red mic influence was enough to restore the vitality of the subjugated Nations. None, neither in Europe nor Asia or Africa, after the demise of the Roman rule to bring it back to independent life; the cosmopolitanism of the world empire had victors and vanquished ruined and they all became the prey of fresh peoples with intact nationality. The Romans only have ethnic corpses and the decay of the Byzantine heritage continues under similar conditions among the Turks.

We have another, closer, Example of the impossibility of different, completely alien to unite nationalities into a living state, if one is not able to completely control the others suppress. If this latter is the case, and it is often a historical necessity, so after long struggles and suffering mixed peoples with a new and perhaps even better character emerge "as this in some respects the English claim about themselves. But such results, despite close kinship, are a half a millennium of political suffering and national death of the original elements.

Lust for fame or other common interests may for specific purposes in countries with foreign elements elements temporarily replace the national feeling, but in normal circumstances it is so much the basis of all patriotic virtues, that even a weakening of it becomes dangerous. In the latter mixed marriages, the circumstance instead that the number of children, if the father is Jewish, is 1.45, if the mother is Jewish but is 1.64.

The above wonderful numbers find their origin clarification in the racial differences. The largest part of the Catholics living in Prussia are of Slavic origin, as the provinces of West Prussia and Posen have the highest Birth rates: 45.9 and 46.2 per 1000 inhabitants after and similar phenomena in Upper Silesia Königshütte with 53.6 and Beuthen with 51.2 are only reached or exceeded by a few Rhenish factory towns. where probably the Catholic areas usual early marriages. The influence of race This is also reflected in the lower number of children in the Catholic mixed marriages between Protestants, which in the majority The majority are probably Slavic-German mixed marriages. Surprisingly, however, the reduction in the number of children in the Christian-Jewish mixed marriages, which barely make up a third of children from unions between the two races More striking than nature does here, There is no evidence that Ariar and Jews do not belong together and we would envy his courage, which, compared to these numbers, wanted to claim that the Jews were Germans.

From Tables IV, V and VI it will be seen where the Jewish advocates probably do not know, and where they are probably Jews themselves. The latter is probably the most common case. We intended a statistic of political newspapers in relation to their Judeification, but on closer inspection This proved to be unnecessary. The number of Jews-free Blätter is extremely small and is limited to Berlin to a few mostly ultra-conservatives. The the rest are all more or less in Jewish hands or in Jewish gangs.

What were the Jews?

Every people in the world have always prayed for Malice and revenge, through cowardice, pride, superstition, through usury, fraud and theft more unpleasantly distinguished than the Jews. In their Throughout history, one can hardly find a single noble, Spirit and soul uplifting trait, almost no generous and beautiful action, as we see in the Greeks and Romans and almost all older and newer peoples so many encounter. Anyone who has ever carefully leafing through the Holy Scriptures, you will convince that Abraham, Isaac and Jacob, these praised patriarchs of the Jews, arch-rogues and nothing better than the majority of their descendants.

This judgment seems harsh. Therefore, let us throw it A look at the biblical story that leads us to must serve as a guideline for our faith. So first Father Abraham.

Moses himself describes him to us as the worst of the swindler, usurer and liar that could possibly exist,

and what Moses tells of him must not be taken from Judah

which are still doubted by Christians.

42

When father Abraham went to Egypt to to live quite cheaply, he said to Sarah, his Woman: Behold, I know that thou art a beautiful woman from the face, when the Egyptians see you,

They will say, This is his wife, and they will

strangle for your sake, and will keep you= Dear, just say you are my sister, so that it may be better for me for Your sake, and

my soul lives for your sake.

Sarah did as her pure husband had commanded her
She was given to Pharaoh, king of the
Egypt, as beautiful, and he took her
because he believed her to be unmarried, as a co-sleeper in his
House. The pious patriarch received for the Kupp=
wages in "sheep and cattle, donkeys, servants,
"Maids, donkeys (a compilation!!!)
"and camels." – When Pharaoh learned that Sarah
was not Abraham's sister, he proved himself above
all expectations noble and generous. He gave the
his wife back to his matchmaker husband and left
They both, with everything they had, on the thrust
and bring them out to the land.

The trick had been too profitable for
the pious patriarch of the Jews did not see him again
should have tried. He therefore went to Gerar and
gave fine woman against the local king Abimelech
for his sister. Abimelech fell in love

But he gave her "as punishment," a thousand silver=

linge, along with the permission to stay with her husband in
to live in any country where she wanted.

In this way, Abraham, who was already
was rich, enormous treasures; only who
could probably have the
scheming, deceitful and procuring Jews

Can anything be more outrageous than this hand-situations with which Abraham's life is tainted?

And yet the Jews praise him as the pious Ken and Beft among all their ancestors. One must therefore wish not to know the worst nen.

This Abraham, whose whole demeanor shows,

that he had neither love nor trust in God,
claimed to be in the most precise relationship with God,
for whose chosen one he blasphemously claimed to be. Gets
He believed that his dreams were inspired by Jehovah,
whom he would have to obey blindly. Then he lured
Isaac, whom he loved since February, through false

another voice in him, which he heard from heaven
thought he could hear it, and Isaac was saved.

This was exactly like his "Tate." He too

But the ruse failed. The king once looked

his deceit. Isaac confessed the deception,
and excused him by saying that he was afraid
to be strangled for the sake of a fine woman. The noble

His pious son Jacob was the worst of the

The time when under the Judaization of state and society a "financial genius" in the service of diplomacy of the state could gain entry and highest position, had not yet arrived for the Bismarcke. Only in the year In 1512 we find a Bismarck in the service of the Elector

we look back at the life and work of the former

Chancellor Prince von Bismarck, as far as the crowded brevity of a narrow framework, with whose ancestry we had to deal with it. This was all the more appropriate and necessary, as the present Prince Bismarck recently did not hesitate to speak with his "dynasty" and that of the Hohenzollern to allow themselves a parallel. |

The boldness of such a comparison calls for a rebuke and a critique of Bismarck's forfe. We have seen who and what the Bismarck, one of whose descendants in this century made so much talk about himself.

World history knows what the Hohenzollerns were. – They have given Prussia and thus the German people a series of begotten by rulers, as they were equally noble, magnanimous and tolerant among all nations and times without equal stand there.

Bismarck, who in all his statements described himself as a
energetic opponent of the revolution and staunch supporter of the
monarchical principle and therefore a sober
insight into the political conditions of his time,
was founded on 2 February 1849 in Rathenow-
election speech as a representative of the Wefthavel district-
land=Zauche into the second chamber of the Prussian Landtag
elected. From the speeches given there we give in-
ftehnend in the extract the one from September 6, 1849,
because it expresses those views
which, as long as Bismarck has proven himself loyal to them,
principles of his work until 1870
and formed the foundation on which the same
as a patriot he undoubtedly had a good basis at that time.

In the following session of the Second Chamber, which was opened on 7 August 1849, the Royal state government by Lieutenant General von Radowitz official notice on the status of the German Ver= drafting matter, in particular on the conclusion of the so-called= called the Three Kings Alliance. The commission proposed Chamber to give its consent to this. In the During the debate, MP von Bismarck=Schönhausen gave the following speech:

I I am doubtful how I can motivate this vote fshould, since I neither in the commission draft nor in the today's debate from that side of the House even one Shadow of the attempt to justify this motion I was able to discover. The application says in other words so much that we, the Prussian chambers, the future of our Fatherland irrevocably bound to the decision of a Reich= Assembly, whose composition we still do not know; and to the decision of a future Ministry, which we do not yet know; because who guarantees us that the Ministry, which is now our all joy at the head of the administration, to the perhaps very distant point in time when this question will be answered divorce will come, nor does this passage claim. Societas leonina, thank you (Laughter), which other states would like even more could stay away from this alliance. On the other hand, the Recent history has taught us that in this strange time of The strong is weak through his caution, the weak ftronk is through his audacity. I can on this page find no equivalent for our sacrifices, I must therefore only seek in the beautiful consciousness, an unselfish, noble policy, the needs of a national rebirth, the historical task Prussia, the moving principles of the previous year, and how such expressions more sounds that are more beautiful than sharp. I I am of the opinion that the "moving principles" of the previous

year were much more social than national in nature; the national movement would be limited to a few, but certainly here= outstanding men remained confined to a narrow circle, if it does not shake the ground beneath our feet was that the social element was drawn into the movement, that through false representations the desire for possession-greed for other people's property, the envy of the less well-off was incited against the rich and these passions now gained ground all the more easily, the more through a long-standing freethinking nurtured at the top (grumbles on the left Page) the moral elements of resistance in the hearts

of the people were destroyed. I do not believe that these Evils through democratic concessions or through German Unity projects will be lifted, the disease lies deeper; but I deny that in the Prussian people the need for national rebirth along the lines of the Frankfurt theories were present. It is here today the politics of Frederick the Great are mentioned several times and these have even been identified with the application of the Commission. This is an equality that I do not believe in believe; Frederick II would not have made the report; I I believe rather that he remembers the most outstanding property ity of Prussian nationality, to the warlike element in her, and not without success. He would have knew that even today, as in the times of our fathers, the sound of the trumpet, which accompanies the flags of the sovereign calls, has not lost its charm for a Prussian ear, whether it is a defence of our borders, It was about Prussia's glory and greatness. He would have had the choice, after the break with Frankfurt, to join the old comrades in arms, to join Austria, there the brilliant role which the Emperor of Russia played, in alliance with Austria, the common enemy, the revolution. Or he would have been free to which, with the same right with which he conquered Silesia, Refusal of the Frankfurt Imperial Crown to be given to the Germans lack what their constitution should be, at the risk of to throw the sword into the scales. This would be a national Prussian policy. It would have put Prussia in in the first case in community with Austria, in the other case by itself the right position to Germany to gain the power it deserves in Europe. The However, the present draft constitution destroys the specific Prussianism; I believe I am exempt from proof of this, since Camphausen's speech on this subject is completely

knowing; but in doing so it destroys the best pillars of

fcher power. Therefore, the royal commissioner is right

when he presented the reasons against this draft constitution in pairs and said: the design is attacked from various sides, he almost said can, of all. But I would not conclude from this that the design was good, but the other way around, that nobody likes him, perhaps with the sole exception of those who participated in its creation. Whoever

permanent corruption of German conditions was prevented.
Bismarck could, as soon as he intended to start the civil war with
Austria to begin to insist on the neutrality of Russia and
France, because both states are concerned about the destruction-
consolidation of the German Confederation, that bulwark which now
since half a century all pernicious disputes-

a fragmentation that would lead Austria into the
violence of France and Italy, Prussia into dependency-

VII. The successes of 187 0.

The events of 1864 and 1866 were for Germans
land the preludes on a small scale to the actions of

* 1870–1871 and some following years and especially regarding Bismarck in more than one respect. |
| –Prussian diplomacy, led by Bismarck, had not to recognize the immense danger with stupid eyes which for Germany was to defeat France for four years
Time to arm Prussia, or North= to outstrip Germany. The entire power of Germanic War enthusiasm, the most superhuman effort of a wise military leadership, unlimited sacrifices of blood and gold, and above all the benevolent providence of a deity now belonged to now also deal with this enemy of Germany to finish in time.

The full extent of the danger in Germany at that time was caused by that omission, shows on the other hand

= T0)

also in the fact that the then head of the frequent Reich politics, the Saxon Count Beust, meanwhile had succeeded in bringing the resurgent Austria, the compliant Italy, strengthened by Prussia, and the armed France the preliminaries of a war against Prussia to bring about a covenant directed against the world, whose strength and Prussia would certainly have been defeated by surprise if not for the France's haste and overestimation of itself forced by the quick action at Ems this would have been forestalled.
– The deity itself with the approaching autumn and a fevere winter then secured our country from other enemies and when spring returned to the same, German Warriors have already done the work and taken honest care of it, that not again so much German blood, so many German tears had flowed. |

Not the writer of that Lucca letter, but the noble Determination and the proud noble feeling of a mighty It was a royal heart that with a quick heroic impulses at Ems all those diplomatic confusions paralyzed, and the Gordian knot of the latter with rapid sword blows pierced through.

The Legation Counsellor, Baron von Los, a diplomat in all a man deeply privy to the mathematical affairs of that time reports: |

“The fact is that the application of the Prince of Hohenzollern for the Spanish throne in 1870 with approval of the Reich Chancellor. |

The fact is that the subsequent decision to withdraw

drawing of the Hohenzollern candidacy under responsibility=ability of the Reich Chancellor.

It is undoubted that this withdrawal is a diplomatic defeat.

It is undoubted that the Chancellor of the Reich supported the Hohenzollern would not have put forward his candidacy if he had

With this defeat, the Chancellor wanted to make peace buy, that is, avoid war.

N Nevertheless, he could not avoid the war.

The war with France (which Bismarck had just said –

anxiously wanted to avoid), that is, the happy outcome

+ the same, the Reich Chancellor owes his current

him such a fortunate position of power.”

The publication of the above in 1876 had to “the great statesman” was very unpleasant, he asked

against the author, and the same was, in that the facts had to be admitted, to prison sentence condemned because it was assumed that the author had want to say that Bismarck had more luck than sense!! The diplomat, who in 1867 with Luxembourg=Limburg had not shied away from sacrificing part of Germany, to uselessly escape a war that would destroy all promises of success for himself, had once again on Cost of German honor, instead of the candidacy for the Spanish to leave the throne to the Spanish, the same to the French obediently annulled in order to achieve a foul peace secure. |

Only the unexpected blindness of the Napoleonic

According to Jules Favre's report, the Chancellor had Contribution initially set at six billion and wished that the French government would seek the help of the Bleichröder and Count Henckel von Donnersmarck at These gentlemen had their financial plan to Messrs. Thiers, Favre and a parliamentary Commission. The presentation, however, had such a meticulous impression that the same was from the "feeling national dignity" had been rejected by the French.

These financiers would have been grateful for their efforts no less than "three billion" in "guarantee, commission-fions" (On the Romanian railways Bleichröder later proved to the detriment of the same what he understands under this artificial term.) Bismarck then ultimately from the participation of the Prussian bankers and the contribution even reduced by one billion. – Schramm puts the matter as as if Bismarck had, by leaving a billion from those already established and agreed "six" the silence of the French about the "meticulous" and "unworthy" proposals of the Prussian bankers– want to buy.

BE 70,

The “billion dollar blessing” was now spread over Germany shouted out! Bismarck, the strong man at the head of the Reich government, Bleichröder, his noble comrade, as secret Councilor and political confidant of the Reich Chancellor, as well as Administrator of the Guelph Fund! –! –! What was the need now nor “the tutelage of a narrow-minded Prussian Government”! – Away with the fatherly care of a noble ruling family, which for centuries has ruled our ruled the country and led it from poverty to prosperity had! – Away with all trade and – change! Inhibiting Shackles and barriers; long live the freedom and glory of new German Empire under Bismarck and Bleichröder! Under the leadership of such forces, Bleichröder the modern Faust and the strong fist “Bismarck” united, the brilliance= time of the new era begins. |

“The intimate relationships, asked the Kreuzzeitung, of Mr. von Bleichröder to Prince Bismarck should be at least at least from the pre-ministerial time of the prince= as the same only with Prussian embassy business and without significant assets his sovereign in Petersburg, Paris, Frankfurt, all= had to have good advice in financial matters.”

So these two men had already recognized each other and found before the world had any idea of its significance and to get to know them in larger actions ity, actions whose field is now primarily the stock exchange and the press were.

It was certainly extremely practical and is a further evidence of the well-known household sense that the former Chancellor in some matters—ities that he has proven the one who founded the Guelph Fund in his hands and thereby in his financial and moral credit before the public such a significant expansion, now also in finance and

other matters were also consulted. This could both parties only be beneficial and instructed and sharpened the Chancellor's understanding of financial matters. In this way, the Lord "Baron" von Bleichröder became a *Art spiritus familiaris* of the Reich Chancellor. | It is often rightly and from the most competent side pointed out that Bismarck was influenced by the internal, the people= and economic affairs no understanding. However, the Reich Chancellery submitted a proposal to Bismarck= often intervened in such matters and so it was because it is very practical when assessing the latter *ae fspiritus familiaris*, which it from fine Jewish racial origin, all these inner opportunities to convert into simple monetary points and therefore to be judged with practice. Bleichröder, said the – *Krenzzeitung*, if smart enough to always hide behind the scenes to keep, he even keeps his person unknown, his photo= graphy is never seen in any shop window (in addition although aesthetic reasons may also have played a role) and nowhere does it emerge. In the latter respect It remained a significant factor that Bleichröder alone foon, as Wilmanns tells us in his book: "The golden Internationale" tells, more than fifty German newspapers in his property and others in his pay.

From this point of view, a clear view can be throw light on the dark paths that the fate of the German people were forced to live under such leadership. After Bismarck had already been a member of the North German Confederation the people as a first-fruits gift of this important state–man with equal, universal and direct suffrage The Chancellor wanted to give him a second happy gift regarding the uplift of the soil credit relationships.

In order to temporarily suppress Windthorst’s revelations, to cut the matter, referred the matter to the Budget Commission, whose chairman was Mr. von Bennigsen, whose lazy Altenbeken Railway=Priorities also owned by the state funds were located! The “Eisenbahn=Zeitung” now published a Article about this commission meeting, in which they correctly predicted– said that the corruption system of the liberal consortium has now been revealed and is facing bankruptcy, “the current most important question,” that newspaper aptly stated: “If Prince Bismarck takes the liquidation into his own hands take what he can, or will he go bankrupt be involved and liquidated? = has the choice, but even this choice.” |

§ 133 of the Criminal Code, on the basis of which the Count sentenced, reads:

"Anyone who has a document, register, file or counterfeit ft, which was for official storage in a certain places, or which are assigned to an official or have been handed over to a third party, intentionally destroyed, fide, or damages, will be punished with imprisonment." The Chancellor, who had previously been an ambassador himself,

It was clear from my own experience that even a departed ambassadors always still have the files is a competent person, and this person, if required, never to regard the documents submitted as "put aside" were traditionally worn.

Count Arnim says in fine writing: "Pro nihilo" very aptly, that he had only the understandable intention to | Embassy Chancellery not to hand over those documents, which contained evidence of the abusive treatment, which he has been given.

The Count, in his health through the von Bismarck insults inflicted on him for years already on the attacked to the utmost, escaped the recognized threat that threatened him Imprisonment due to flight abroad. |

Bismarck could therefore know for sure that the count in the case of a new lawsuit to the required personal truth-taking of his right could not appear in the same.

A new, even more serious lawsuit was filed because of land-treason was therefore plotted against the count, because he was in the difficult negotiations with the French government regarding the repayment of the billions, a delay should have caused.

On 15 March 1873, the German Empire and France concluded a convention through Count Arnim,

Those banking transactions, the Jewish vacillation,

this haggling and manoeuvring with the political parties, this legislation influenced by selfish special interests, have long shown the attentive observer that some a Jewish hand was involved in the city tax.

The material connection alone meant that Bleichröder to come into close contact with Bismarck "In money matters, comfort ends" says Hansemann – "but friendship often starts with that" thought his neighbor on Behrenstrasse. A "friendship" which the clever Jew gradually developed into a ruler to expand, the extent of which is not known in public – Jules Favre already mentioned, that, as already mentioned, Bleichröder had already fought against Count Arnim agitated, a proof of how uncomfortable the Jews such a brave, genuinely German-thinking man, because "Bleichröder" is not Bleichröder alone! – To make the fabric clear

To see through it, it is important to keep in mind that Bleichröder

The Jews of the whole world are under a blanket under which one can see will and opinion Rothschild's smells the most.

The German Count Arnim, the most deserving diplomat Prussia, after losing his only daughter, in Auslande then soon died of grief.

F But this Bismarckian policy brought the German people another misfortune: the ecclesiastical unrest in the country and the intensification of social class conflicts. "The Consequences are always the best witnesses" and these consequences have too clearly shown to the whole world what nonsense this so-called "church policy", to which Count Arnim also gave a different opponents, actually, was, than that it was a

About this book

This is a digital copy of a book that was kept on library shelves for generations before it was carefully scanned as part of a project to make the world's books available online.

The book has outlived the copyright and can now be made available to the public. A book in which was never subject to copyright or whose copyright term has expired. Whether a book is vary from country to country. Publicly accessible books are our gateway to the past and research and scientific potential that is often difficult to discover.

Traces of use, notes and other marginal notes contained in the original volume can also be seen. A reminder of the long journey the book has taken from the publisher to a library and then to you.

usage guidelines

Google is proud to partner with libraries to digitize publicly available materials and make them accessible to the public. Public domain books belong to the public and we are only their custodians. Nevertheless, this work is costly. In order to continue to provide this resource, we have taken steps to prevent commercial parties. This includes technical restrictions on automated queries.

We ask you to adhere to the following guidelines:

+ Use of the files for non-commercial purposes We have designed Google Book Search for end users. Use files only for personal, non-commercial purposes.

+ No automated queries Do not send automated queries of any kind to the Google system. If you are interested in machine translation, optical character recognition or other areas where access to the data is useful, please contact us. We encourage the use of publicly available material for these purposes. We may help.

+ Retaining Google brand elements The Google "watermark" that you will find in every file is part of this project and helps users find more material through Google Book Search. Please do not remove it.

+ Stay within the legality Regardless of your intended use, you must be aware of your responsibility to ensure that your use is legal. Do not assume that a book that we believe is legal for use is publicly accessible, is also publicly accessible to users in other countries. Whether a book is publicly accessible varies from country to country. We cannot advise whether a particular use of a particular book is legal. Vorworld

The first edition of our little book is, despite the obvious
the silence of the official and semi-official newspapers so quickly
been sold out, that we repeatedly asked from different sides for
were requested to organize a second one.

We agree with this, but do not consider it time yet,
to be clearer and limit ourselves to only the An=
note on page 10 of the first edition to add an addition,
to which we draw special attention here.

A large number of misleading printing errors are
been corrected. '

Various attacks are being made against us by the daily press.
which we also respond to in this preface.

That we are close to the stock exchange papers and their purposes
newspapers would be thoroughly processed,
we could be prepared. The other newspapers are generally
still treats us leniently. From which we are saved by various
friendly mediations so far received flower selection
We will only highlight the most noteworthy points as briefly as possible.

The Magdeburger Zeitung had informed us in No. 484 about the statement was put into his mouth that "if the government does not other paths, one will be forced to deal with all recklessness to clarify facts." She has this misunderstanding and a second one with regard to civil marriage but by agreement printing of a letter in No. 493, that we only considered the latter if the provocations of the official press and the attacks against the independent elements in the country did not stop.

The Nationalzeitung, after publishing without any legitimate reason our small writing with an explanation associated with the economic reform party – (ours Name only happens to be the first in the alphabet under that explanation) – and has indicated that simply an attempt by the old conservative party, the terrain on economic

To regain territory that had been lost on political fei, in No. 487 the following sentences: "For this purpose one uses The Orthodox fear the end of the world, they seek the Prince Bismarck, whose merit culminates in the fact that he has managed to throw off prejudices, to present it as whether he personally would agree with it and only because of the whose minister is not allowed to appear, one tries to... rity for one's own purposes. pp...-... Furthermore: "If the party gained the majority, we would not experience more than what we experienced in the fifties, a funny revision of the latest legislation: General Voting right, freedom of movement, freedom of trade, property tax, – there would be measures material enough for feverish activity. Not a single Every creative thought can be found in these programs We get nothing but the old recipes of reaction, which are as old as human society." Finally: "Until clearly shows that this is not about old conservative agitation we will be forced to join the agrarian party and the economic Reform Party to be considered identical with Junkerdom."

We asked the Nationalzeitung itself to consider whether this tone fits with the seriousness of the task, for which we have written our little brochure and expect from her the already promised remedy. All this she brings, without foft a word from the brochure, nor the program of the innkeeper= fcient Reform Party, whose content they nevertheless dismissive criticism. If it does not finally to discover the only thought in the two documents and see them as an outflow of the "Junkerdom" considered, we will wait and see whether it leads to an explanation this judgment or whether we agree with her, which we would like to avoid, – perhaps even in a slightly modified key must.

The Kreuzzeitung prints in No. 246 a section from the brochure and then continues in a postscript: "So far Mr. v. Dieft=Daber. As is well known, he takes a special=théné political position and does not directly count itself to the Kreuzzeitung Party." And then: "We only want one thing note that his entire exceptional standpoint

on an unconquered or not at all surmountable=the contradictions between head and heart seems. We want to subjectively respect this contradiction and hence to the repeated assurances that he did not want to grasp, but only clarify, make no comment on our part. But objectively we must judge political "Keep relationships to what the head, and not to what the heart speaks. Yes, the material supplied is even much more valuable than it is against the language of the heart and far of every possible irritation."

Why our position is a "peculiar political" should be because we do not directly belong to the Kreuzzeitung party and we therefore take an "exceptional" standpoint It is not clear to us what should be done. A single newspaper can, according to our In my view, a particular party direction is not currently relevant say or represent, because in this transitional stage it is There are no clearly defined parties at all; unless there are such which either blur or are only directed at the attack. Furthermore, we believe that our essentially based on the real=politics with the retention of Christian and monarchical principles daments directed standpoint is therefore not yet exceptio=nell deserves to be called because he is not directly the cross= newspaper. We are even less able to accept the alleged To clarify the contradiction of the head and heart. The The latter has absolutely nothing to do with this, unless the patriotic heart is meant by this. An attack, or a Clarification can be as precise as a hair, but it still needs not to be bitter, especially if the person against whom they directed, has by no means given up, but rather still a great and noble disposition. The latter may probably also a point of difference between us and the Kreuz=Zeitung. –

The "Deutsche Landeszeitung" wishes in No. 244 that we should have spoken more clearly, saying: "It's just a pity, that Mr. v. Diešt acted too discreetly and even much can be guessed." The accusation that we are too lenient and backward=

been holding, has also been done to us several times. We believe, however, that too much restraint and discretion is more likely to be excused than too little. |

The "Post" in No. 246 has given us on the whole a benevolent
However, it brings against the
At the end of her detailed article she wrote the following sentences: "The author has his intention not to have any direct opposition to the prince Bismarck, faithfully held on. The title of his work looks darker than the content justifies. Overall, Mr. v. Dieft the present of our state is probably too gloomy No earthly state is perfect, every time has its own evils and every law that marks a progress net, but also brings forth new complaints, which one can The question then still remains whether the purchased goods were worth the purchase price, whether the profit achieved fchschrift the bad things that come with it outweigh the bad. We believe that the latter is the case. Not only our external Power has risen gloriously, and our inner The situation is constantly improving. Against the inconveniences We do not close our eyes; but we do not have to exaggerate. The fight against evil and bad will never times on earth." We regret that "Post" in this optimism, according to which they "our inner situation as being in constant improvement", not to follow and ask that they forgive us the exaggerations of which they accused, individually. To emphasize just one thing, fo The low percentage of church weddings in the Cities since October 1st have been opposed to all ideal concepts In view of the consequences of the Civil Status Act, the tip will probably break off. And the Protestant Church is called upon to organize and ftärke thou! – but made more difficult according to the instructions of the Ober church council the exercise of discipline, and even seems to be the co to postpone the appointment of the Provincial Synods, which but first the organization should bring. Nor can We admit that the title of our little book is gloomy free, than the content, and that we see too gloomy. One must can also read between the lines, and some readers will This will make the gloomy thoughts that we are faced with more understandable. Because of the restraint we imposed on ourselves, we did not fully were able to express themselves. |

The "Volkszeitung" writes in No. 247: "Much interest has

the writing of a member of the altfonfervative party, Mr. v. Dieft=Daber awakens ɾc. i. As with most, fo We and our readers also owe this interest to mostly only two letters that the author wrote over the years received at his suggestion from Prince Bismarck and published in the same, from which it is quite clear= goes, how extremely little it has to do with the liberal transformation. of the leading statesman has to say, from which the Thousands of National Liberals from the common Philistine= fugge fuch to tell ɾc. .. The second letter, however, lets grateful to us against the rigid attitude of the old conservative party recognize that, according to Bismarck's own inclinations, the civil status law is certainly much less decisive and fund would have been the case if the said party had and had not cut his tablecloth in the meantime." Well, we congratulate the state government on this recognition of the Progress Report regarding the fruits of that "health" of the Civil Status Act and have nothing to add.

The "Staatsbürger=Zeitung" in No. 295A holds fiğ about our call to the nobility to establish a serious school to go through, not to shy away from work and among the workers for the state to be in the forefront. Then the Con= fervatismus in Prussia have a future and then notices "In the same breath where they (the Junkers) spoke about the omnipotence of capital and their efforts with the cloak of Christian love, the authority of the State in the service of their egoism! The wages of the workers whose interests they claim to protect feel against the "money power", perhaps even more The "socialism" they call for is supposed to be replaced by the Destruction of universal suffrage, freedom of coalition and freedom of movement should be silenced! In fact, Junkerdom has not yet been sufficiently recognized, the self-accusation which comes from the mouth of Mr. v. Dieft=Daber, should all Banish doubts about the character of "conservatism", which is happily buried and will never rise again." We only register this without going into further detail= fetting with the sheet. We only notice in

– X –

the hope that the correction will not fail to materialize, that further reduction of wages, of Junkerdom ɾc. not a word is written in our Scripture.

The "Berliner Börsenzeitung" notes: "The booklet This is further evidence that even relatively moderate members the conservative party's hatred of the "new era", the "Li= "centralism" and "parliamentarism" have become almost fixed ideas= As a single example of the strange ways in which state-saving ideas of Mr. v. Dieft, free from the Bor- highlighted, instead of universal direct suffrage to introduce a five-fold distilled voting mode, so that the municipality the district representation, from which the provincial representation and finally the Landtag and Reichstag should emerge." On a We have no intention of reaching an understanding of any kind here either. and are happy to admit that the ideas of the stock exchange papers are state= become more saving than ours.

The least polite to us is probably the Neue Stettiner Newspaper, which as its motto as in the Prussian Adler wears the Suum cuique. In No. 492 she first regrets that the letters addressed to us by the Prince Chancellor without all political content and purely conventional replies on outpourings of the heart. With extraordinary patience I confess Prince Bismarck thanked me for receiving these lamentations also occasionally for this and regret not having time for the rest have to respond to the comments made, or declare them to be superfluous. The paper confirms then gives us the possession of a "Pomeranian stubbornness" and concludes: "The entire content of Dieft's book proves that this empty Rodomontaden. Such unclear and undisciplined minds, like Mr. v. Dieft, can never give the state and a government with fixed goals become dangerous. Because they do not know what they want." Why so rude; it must surely Some of what we did in the paper which by the way, only in the category of small barkers should have been sitting. In the rest, we very much acknowledge the "Pomeranian stubbornness" and congratulate the paper on its clear Opinion on the content of Bismarck's letters.

The Ostsee-Zeitung, published in the same place (Stettin),

(No. 490) notes, however, with various other sheets, of those letters, "that they shed some interesting light on the situation stance of the prince on the questions of internal reform."

The Danziger Dampfboot (also the Wefer-Zeitung and the Berliner Tageblatt) state: "How must the Auf= conception of the present is only now emerging in the minds of these gentlemen crystallize, if even this Mr. v. Dieft instead of the all= common direct suffrage a formal distillation apparatus on= wants to build, in which the farmers first elect the district representatives fallen, then the district representation, the provincial representation, the Provinzialvertretung the Landtag and the Landtag finally the Reichs= day. Such a fifth of juice would, of course, probably be

taste of the Conservatives; but Germany will not be that it would never have become Germany if the gentlemen Conservatives had remained at the helm."

We can simply counter this: Germany may not forget that it would never have become Germany if Prince Bismarck was not once against the parties with which he now compromised and ruled, stood in the breach. The army= Reorganization would be according to the will of the same gentlemen not carried out at that time, the war of 1866 not fought and who knows what the outcome of the campaign of 1870/71?

The Conferservatives have, in their loyal steadfastness in that time no small share in the successes in both the parliamentary conflict than on the battlefields! From stock exchanges= swindlers and doctrinaire newspaper writers was on the latter little to see.

The Berliner Tageblatt also expresses itself in No. 242 like the Danzig steamboat, but then in No. 246 the following= measures: "By naturally and with full sufficiency= thuung on the side which Mr. v. Dieft is fighting, fuch we must nevertheless respect the honesty and the indomitable nature of men= attitude of the same. This sheet, although fine= standing on our political standpoint, it seems to have more understanding of this system than, for example, the New Stettiner Zeitung and also "die Post".

There is no doubt that all of Germany is Prince Bismarck for the eminent successes of his foreign policy is obliged to express his greatest gratitude, but on the other hand, his domestic policy, which has been in a transitional phase for several years fisch is located, shadows, after which the fear is close is that they easily obscure those external successes, even to a great extent

can destroy parts.

Because what good are external successes if the inner strength and the discipline will be lost! For the religious and fundamental foundations of the German people are threatened in the current situation such dangers; – who would want that deny? –

The direction which the government system and the laws have taken, in our opinion, increased this drive and accelerate decomposition. |

Let us not deceive ourselves about this. – The time in which we live, has in some respects great similarity to which preceded the French Revolution. at that time hostility towards Christianity, money power– fraud, corruption, agitation of the masses, and no sustainable organization against it by the government and society legislation.

We can only add the hope that the House of Hohenzollern put up a strong resistance in good time= ft and that the German people through God's help will have the strength to save ourselves from the abyss into which France sank at that time.

More than 20 years ago we started the fight against the demoralizing financial powers such as now the social question arises.

1

u

As for the latter, we find the challenge that one fides the government of the industrial workers – population through strong organization of their estate household to devote a warm interest, and thus to do everything energetically to fight, which is rightly a reason for dissatisfaction= ity, but on the other hand also through legislation and executive is to be practiced.

Unfortunately, a picture unfolds before us of how the Indiscipline in the country is making rapid progress and the power of money has a demoralizing effect in our fatherland, the Equality before the law undermines, depraves the Seamtendland virt and all the members of society, including the people's representatives, more and more eats away. l

It seems to be a serious, holy task to be vigilant and

against these ever more pressing enemies! The money hydra, from which socialism emerged with, is ruthless on to kick in the head. The history of other European countries which, in particular, the events in America, contain for Germany an urgent warning!

To achieve great goals, ruthless effort is necessary—sometimes necessary False considerations do not harm rarely the interests of the country!

In ongoing challenges, be it in the official Daily press, or in officially inspired brochures, the independent dependent, untouched by financial fraud and ambition, elements of the country, which primarily make up the land, bombarded, even in loyalty to His Majesty the Emperor and King was suspected. This independent party, whether probably because of its stability it is particularly suited to the true to protect and secure the interests of the country and throne has so far remained silent. However, she explains that to have reached the outermost limit.

There is rightly a concern in those independent circles with regard to a certain loyal reserve towards the past and fear of openly opposing the leading statesman and we ourselves are among those who believe the latter to prevent this. This position should now be confirmed will hold, although after those continuous provocations of the

a

Government press from the other side almost emphasizes the effort to continue the fight to the death. If this changes Appearance does not and later the necessity arises, ruthlessly to clarify facts, so on this side at least openly and honestly “with God and knightly weapons” — according to the statement of Gustav Adolph — be fought.

There is no intention here to act in an aggressive Instead of engaging in sharp criticism, it is more appropriate to seek moderate and Gentle restraint should be exercised wherever possible. Only unshakable loyalty to the Emperor and King, the interest of the country, the love for the dear German fatherland comes first!

The task we set ourselves is serious and difficult! Success — when God is not powerful in the weak fee — probably only slightly. There is no evidence of violent attacks and

There will be no lack of speculations! We do not shy away from and would like to proclaim with Luther: I

"Here I stand! I can do nothing else! God help me! Amen!"

Where such a task is concerned, even a free word about such an important statesman as Fürst Bismarck, at the place. One of his greatest supporters – in some relationships but also the toughest opponents – should give the prince once said:

"He has no idea about the moral needs of the country;"

whereupon the prince initially rejected, but after a few days with replied to the comment:

"It was a sharp remark to him in the presence of the beard was shot past!"

There is a certain truth in this, but also a kind of apology for the prince and the hope that he in an open and honest discussion towards oneself at times does not necessarily behave in a repellent manner.

From these points of view, we want to present the leading statesman

I. the government system,

II. the parties and their ability to govern, as well as

III. the expected shape of the future

We will briefly examine the events of the past. We will look back at the destructive money power and the social question.

The boundary between what is in the interest of the matter must be said now and what is better still remains secret, is often difficult to find. We After practicing silence for many years, we will Try to draw the line according to your own prudent discretion.

Wherever one believes to find frankness, we ask Forbearance. Our free word does not mean to hurt, but only Form of historical criticism can be a stimulus and a warning.

The government system is best examined at the Direction which the legislation has taken in recent times tried and in its results. We declare ourselves against this direction because it is not based on the sober and serious knowledge of practical life, but on beautiful sounding doctrines and ideal theories, because they were not with wise caution to the historical past of the country. but in hasty haste, without considering fight on the level of public education and without sparing the popular consciousness created laws.

Here we can draw on the words which we found in a earlier small paper: The Reform of the Prussian Administration 1869, Berlin at Julius Springer, following an expert opinion Stein's from the year 1822*), where page 17 three main ideas are highlighted:

1. That the bureaucracy" ") felt its guiding principles

drawn from real life;

2. That the laws in earlier times were in the law= Commissions were prepared and thus less frequently appeared, but just and lasting;

3. That the future does not end in a destructive and vain dreams, but rather a naturally created, through tradition and history- ftory sacred past.

Regarding point 2 we noted there (pages 18 and 19): "We "must change the way in which the laws are currently being prepared, "the stage before the introduction by voting among the

"With work comes understanding and with the
"Confession gives rise to the conferservative attitude."

We see this now with the beginning implementation of the Self-government in the district committees. Self-progress people (– unless they are completely crazy) – work in all practical conferservative principles. We would just like to

doubt that the author of that little work in much of what he otherwise expresses, in the sense indicated by himself above to be counted among the "conservatives" and ask whether he not subject to self-deception?

There is one thing above all that is important when presenting and advice of most recent laws catches our eye:

The government defends and does not hold a shady position, but gives its principles – (if they exist at all which has) – with ease:

As in the art of war a general or fortress commander client is obliged to observe certain rules, such as must steadfastly resist the attack, even the storm, before he can withdraw, surrender the fortress, and also in of statecraft. The confidence of an army in the leadership a commander-in-chief would soon be lost if he quickly vacates his position or gives up his fixed place too early. A court martial pronounces his sentence and executes him ruthless. History will one day record an even stricter Judge about the success of the internal policy of the leading statesman of whom we speak.

Discipline and quick-wittedness, prudence and iron strength characterize the successes of our generals and armies in the last German wars. With trust in God and humility, without over= raising, the German warriors faced the enemy's attack and therefore God pinned victory on their flags. –

What we most value in the conduct of foreign policy by Prince Bismarck, is next to the eminent Ability with which he understood Germany "through blood and iron" together, just moderation. The It already belongs to history and can therefore be boldly It can be said that it was Prince Bismarck who was responsible for a strong current from high place against in the year 1866 it through=

knew that the old Hohenzollern ancestral lands (Ansbach and Baireuth) remained with Bavaria and Austria had no village was taken. The beneficial consequences for the year 1870 fhave not failed to materialize! Because who knows whether Bavaria will would have rushed to the flag with joyful loyalty to the federal government if it had Loss of those parts of the country would have been to bemoan. The peace treaty in 1871 was moderate. The fortress Belfort remained in France, the billions were reduced. –

What is striking, however, is that almost simultaneously with the

beginning of the great successes in foreign policy in 1866 saw the turning point in the Count's domestic policy. Bismarck and gradually an abandonment of the Position occurs, which he had defended until then.

Mr. von Bismarck has always openly declared himself a royalist and acted as such. We do not believe that the spirit of the newer legislation, as well as according to various Characteristics in recent times to Royalism in equally energetic In the same way as before, services are still provided.")

Count Bismarck made his debut with:

1. The indemnity investigation and
2. universal equal voting rights.

This was followed by:

3. freedom of trade and association and freedom of speed;

*) Remembering the restraint we imposed on ourselves, we remember to the noble history of a Berlin banker and a gambler, a newspaper founder, to the reason for which the Undersecretary of State von Thile suddenly left, to the way in which in a few days the Central-Boden-credit society, as well as the Hannoversche Provinzial-Fonds, the draft of the Civil Marriage Law, the Military Law came, etc. Some character traits in this respect have so far been little studied. That the monarchy is suffering damage in the current times, There should be no doubt. The task of the leading statesman It will be necessary to help build a strong dam against this, have to contribute significantly to a modified direction of the newer legislation In many circles, several times, as we have experienced, even in military There is no clarity about this in the circles. A single spark could create this clarity.

the Hanover Provincial Fund;

the Act of Stock and the Freedom of Usury,

tax legislation;

the district order as the beginning of the administrative-reform organization;

8. the School Supervision Act and the Church Laws;

9. civil marriage and the abolition of compulsory baptism;

10. the military law.

It would exceed the limits of the task set for us. ten, we wanted to go into a detailed discussion of all these Laws occur where not even the chronological order could be paused precisely to ensure the togetherness individual ones. Only a few main points should be highlighted= be lifted.

0 00

1. The Indemnity Law was the first step which the leading statesman a turn in his inner Politics. He had truly shown that he could stood to stand in the breach and in the years which usually referred to as the "conflict period". He – against the will of the parties with whom he is now working, – this cannot be emphasized enough, – the foundations to his foreign successes. Nor do we judge with the sharpness, as it happens from some sides, just about this indemnity law. Because we are, we fear not to speak openly, no friend of the so-called Backdoors to the provisions of the Constitution or, which is pretty much equivalent to the validity of Ministerial Rescripts and Structures against the Regulations a law.

At first glance, the indemnity law has a rather innocent appearance, but upon closer examination the matter gains a different shape.

For the continued collection of taxes and the payment of the maintenance and defense of the country The state government was also without the creation of a budget law according to the constitution and This was the legal basis for her conduct.

at a time when the currents in the House of Representatives how often ideal constitutional theories are more important than real ones were inclined to devote themselves to the needs of the state. Where would we be? if Mr. von Bismarck did not resist But that after a victorious battle Count Bismarck with a royal proposal before the country= day and the same party that he has just joined for the salvation of the Father= country, in a sense pronouncing a "Pater peccavi", was too far-reaching a concession to parliamentarism

would have been requested in which the subsequent discharge
for all expenditures of the state government over the budget
been granted and the latter did not react defensively
But the chosen form of a royal proposal seemed
at least for us it is not appropriate to the situation.

2. Universal equal voting rights (Article 20 of the
Reich Constitution) is probably with the exception of the extreme and
ultramontane clerical party, after the experiences which
fits application in practice has offered a large number
of defenders can no longer be found. Even in the national=
liberal party, as far as we know, many of its
former supporters came to a different view.

If we briefly follow its history,
However, the decisions on this form of voting were
meeting of the constituent North German Reichstag by
earlier statements of the Prussian government from the years
1863 and 1864 in such a way that a free Ent=
conclusion in another direction hardly seemed possible.

In the Reichstag debate, MPs Weber,

MP Windhorst was already in favour of the proposal at that time.

The Member von Sybel states in particular,

"that the universal direct and equal suffrage for

The MP Windhorst, on the other hand, perhaps already in
foreseeing the clerical turmoil, sees himself
"called for some reflection", consider this election=
right but
"as a given fact",

and the deputy Schul ze-Delitzsch sees this as
"the only effective counterweight to the fo=
"cialist egalitarianism."

Count Bismarck is under emphasis on the status
quo the question is debatable,

"he considers it open until someone convinces him

There is reason to hope that in the
Hürften Reich Chancellor the conviction of the necessity

We first list the statements of some heads of state
men and historians.
Walter Bagehot writes about English constitutional conditions
and mentions in this work the universal equal right to vote
"the ultra-democratic theory."

Macaulay speaks in a speech to the House of
Commons, May 3, 1842), as follows:

"The core of the charter is the Aigen Stimm=

The Reichstag deputy von Minnigerode has

 "It was only the Convention Constitution of 1793 that introduced the restrictive

"will lead to anarchy and sabre regiment, as in
 "France! And then we should continue in the daring game of
 "newly resurrected German imperial power the unlimited
 "Confronting the masses with solidarity!"

Finally, Georg von Vincke speaks in a letter
 from July 1868 to us,

"that in the future we all have the voice:
 "the eyes would still be overflowing."

How we imagine the solution to this question in the future,
 We will come back to this briefly in III., but note here
 It is clear that the district order, despite its many shortcomings,
 which, if they are not of a fundamental nature, are often found in new
 organizations must first accept
 can provide a healing support. The many
 Elections that have recently been thrown into the country,
 find it certainly very uncomfortable and often our
 View not conform. Only if the area representation by
 Elections from the municipalities, the provincial representatives

tion in the same way from the circles, then the provincial representation will conduct the state elections and the state days can elect the Reichstag. It seems to us that this is thought arising from practical life is too subtle, "against the Consequently, the liberal parties will not object and which has freed the country from much unrest and agitation would free. –

As a temporary solution for the first time, to get something quickly Having something ready at hand, Count Bismarck could at best to resort to universal equal voting rights, in the long run he will not be able or willing to keep it himself. –

3. Freedom of trade and association, as well as freedom speed laws may in some respects be a which have been based on the right idea, the execution of the same in the way it happened, but also shot over the goal and was based in some main features on liberal Theories and not on practical life. The question of the necessity of criminal prosecution consequences of the fraudulent breach of contract have been discussed so much that we limit ourselves to the most concise presentation possible. restrict.

It seems to us beyond doubt that such a criminal offence follow-up must occur insofar as a civil law reaction to Compensation proves to be unfeasible or inadequate This modification also provides the basis for progress objections often heard from the Christian and socialist side, that criminal prosecution for breach of contract also lets against the other party (the employer) Because in most cases this will lead to the damage can be stopped on a civil law measure can.

That such fellows are just bunglers can be seen, think, and the masters also almost universally express the view that the training of proper men for the future can no longer be counted, only the stock from earlier times with a few exceptions, is still capable of performing. In addition, that since the new legislation even the compulsory admission and return of the apprentice to his master – (probably as contradicting modern civilization) – no longer permissible is, but here too it is only a civil action for compensation supply.

A few months ago, many public newspapers reported news of an alleged Supreme Court decision, according to which the compulsory return of a service offered to the unlawfully abandoned service, as the personal freedom should no longer be permissible. So unconceivable such a decision to the legal expert also immediately appeared; since he complied with the legal provision of § 167 of the Criminal Code, the news still found immediately received by a large number of authorities, especially with many mayors of small towns, who, due to this de facto refused to return. It seems to us, in general, that German country from other countries, especially England and France rich in the practical implementation of indirect tax systems has been overtaken. since the even more correct complete elimination of the same for the probably cannot be expected in the near future.

A tobacco tax should be seriously considered if their income was initially only limited to half a thaler per capita of the population, i.e. for Germany around 20 million Thaler. At the moment it only brings in 3,600,000 Thlr., whereas in France over 76,000,000 Thlr. and in England=land 47,000,000 thalers. We want to pay off France's debts However, they cannot be used as a model and therefore require such a large amount either. –

In the lecture on the real estate stamp on this year's Congress of German Farmers we have already developed a tax reform idea and refer to the stenographic report. We only quote the Words of the Government Commissioner, Privy Chief Financial Officer Burghart from the meeting of the North German Confederation on 21. May 1869 to: |

“While in France, England, Austria, Belgium and

We have not been able to find out whether even the slightest Stamp of 15 Sgr. above Cabinet Order according to the Actien and stock exchange transactions is really levied? – but would like it almost doubt. –

The lecture of Mr. von Wedemeyer, which he gave in Presence of His Royal Highness the Crown Prince in Congress on the workers' question, has been ignored by the liberal newspapers disfigured and violently attacked, probably only for the reason because he often hit the nail on the head. We do not fully agree with all of the statements made by the same, recommend him in the stenographic report but strongly to Reading, especially as it provides important insights into how the social question with inappropriate protective tariff legislation and the state-threatening shift in all economic conditions in favor of capital.

7. The district order as the beginning of the administrative meorganization.

Baron von Stein asks in his above-mentioned good-eighth of November 1822:

“The relative weakness of the Prussian monarchy against the neighboring states can only be achieved through moral and intellectual Strength, through willingness to make great sacrifices of goods and Blood must be replaced in the inevitable times of danger, and this devotion to the fatherland becomes noble=ly generated by the common spirit, which arises from the partial-Participation in the community and participation in the Community Affairs..... The Pure bureaucracy is further mainly corrupted by ical that it paralyzes the community spirit, which is bare participation in public life is formed, first out of love for the community, the community, the province arises and gradually elevates to love of country.

From this it follows that we are in agreement with the main idea which

Some of this may due to the way in which things are now managed from above, – but there still remains a good remnant of old, beloved laziness which must be fought with all our energy. We remind We are reminded here of what Stein has said in many places about the “*depay: firten officials*” says. God save us from with the introduction of self-government, an army of fall into the hands of subordinate scribes! But this can can only be avoided if the property on which shoulders preferably rest on self-government must have the persistent strength to intervene actively. How Stone in a fine, strong and original way in –counter– remarks on a letter from Wilhelm von Humboldt more= professionally expressed: “)

“But of course you have to get rid of the donkeys and good horses clamped when you want to move large loads;” – and:

“However, it would be time to get rid of the donkeys and to harness the grips, but will it happen?

We believe that it will not be difficult to people living in the area, men with the necessary Intelligence, provided that the administration and competence of the local and recourse instances is organized completely differently. If the land ownership but the opportunity that now presents itself will pass, he shows himself negligent in his willingness to perform public duties ten, he himself presents a statement of incapacity attest and it is with its influence on the public affairs for a long time to come.

Yes, he would thereby prove, in a sense, that he constantly needs to be patronized by the man, so you can't complain about it.”

We further stressed that a submitted AEE alone does not provide a proper overall picture of the entire reorganization

Plan could be given without the clarity about such a circular order but only fragmentary and not permanently viable to be able to act. In addition, there is nothing against it to start with the district order, even because the district in the Prussian state was the most viable local association and perhaps the association that extends over the whole monarchy, – which is not the case with other associations – for pretty much in complete agreement today.: Then we continued verbatim:

“For the new Provincial District and an Essentially only one large main frame is required, in the – albeit under implementation of the principle of self-administration, shifting the focus to the local Instance, complete reorganization of the competence boundaries, elimination of the multiple governments in the endless courts, – the individual special laws and statutes while preserving the provincial peculiarities as much as possible abilities, can join in. The other special

regulations would be made with full expert cooperation correction of the provincial transgressions.”

The number of districts in the individual districts was significantly lower than they are now in the administrative districts to execution, in the formation of which the first act of the decentralizing self-government on the part of the Minister of the interior in such a way that he most property denominated in a smaller number of administrative districts respect for the new district representatives appointed by law overturned without further ado and remonstrances of these representatives but rarely noticed. We know of many such cases.

We previously commented on this as follows:”)

“Each district is to be divided into approximately 6 to 10 districts,

to whom the district captains, in the manner of the district administrators, are presented and appointed by the King, with clearly defined functions and to provide for the assignment of executive forces. where the gendarmes mostly still report directly to the district administrators,
They then send the reports to the heads of the offices, whereby
Loss of time and a lot of useless writing arise.

However, the pressure of the bureaucracy must then

About this book

This is a digital copy of a book that was kept on library shelves for generations before it was carefully scanned as part of a project to make the world's books available online.

The book has outlived the copyright and can now be made available to the public. A book in which was never subject to copyright or whose copyright term has expired. Whether a book is in the public domain varies from country to country. Publicly accessible books are our gateway to the past and research and scientific potential that is often difficult to discover.

Traces of use, notes and other marginal notes contained in the original volume can also be seen in this digital copy. A reminder of the long journey the book has taken from the publisher to a library and then to you.

usage guidelines

Google is proud to partner with libraries to digitize publicly available materials and make them accessible to the public. Public domain books belong to the public and we are only their custodians. Nevertheless, the work is costly. In order to continue to provide this resource, we have taken steps to prevent commercial parties. This includes technical restrictions on automated queries.

We ask you to adhere to the following guidelines:

+ Use of the files for non-commercial purposes We have designed Google Book Search for end users. Use files only for personal, non-commercial purposes.

+ No automated queries Do not send automated queries of any kind to the Google system. If you are interested in machine translation, optical character recognition or other areas where access to the data is useful, please contact us. We encourage the use of publicly available material for these purposes and may help.

+ Retaining Google brand elements The Google "watermark" that you will find in every file is part of this project and helps users find more material through Google Book Search. Please do not remove it.

+ Stay within the legality Regardless of your intended use, you must be aware of your responsibilities to ensure that your use is legal. Do not assume that a book that we believe is legal for use in one country is publicly accessible, is also publicly accessible to users in other countries. Whether a book is in the public domain varies from country to country. We cannot advise whether a particular use of a particular book is legal in your country.

Do not assume that a book's appearance in Google Book Search means that it is available in the world. Copyright infringement can have serious consequences.

About Google Book Search

Google's goal is to organize the world's information and make it universally usable and accessible. Google Book Search helps readers discover the world's books and supports authors and publishers by putting more books into circulation. You can search the entire book text on the Internet at <http://books.google.com>.

About this book

This is a digital copy of a book that was kept on library shelves for generations before it was carefully scanned as part of a project to make the world's books available online.

The book has outlived the copyright and can now be made available to the public. A book is in the public domain if it was never subject to copyright or whose copyright term has expired. Whether a book is in the public domain varies from country to country. Publicly accessible books are our gateway to the past and represent a wealth of cultural and scientific potential that is often difficult to discover.

Traces of use, notes and other marginal notes contained in the original volume can also be seen in this digital copy. A reminder of the long journey the book has taken from the publisher to a library and then to you.

usage guidelines

Google is proud to partner with libraries to digitize publicly available materials and make them accessible to the public. Public domain books belong to the public and we are only their custodians. Nevertheless, the work is costly. In order to continue to provide this resource, we have taken steps to prevent commercial parties. This includes technical restrictions on automated queries.

We ask you to adhere to the following guidelines:

+ Use of the files for non-commercial purposes We have designed Google Book Search for end users. Use files only for personal, non-commercial purposes.

+ No automated queries Do not send automated queries of any kind to the Google system. If you are interested in machine translation, optical character recognition or other areas where access to the data is useful, please contact us. We encourage the use of publicly available material for these purposes. Your feedback may help.

+ Retaining Google brand elements The Google "watermark" that you will find in every file is part of this project and helps users find more material through Google Book Search. Please do not remove it.

+ Stay within the legality Regardless of your intended use, you must be aware of your responsibilities to ensure that your use is legal. Do not assume that a book that we believe is legal for use in one country is publicly accessible, is also publicly accessible to users in other countries. Whether a book is in the public domain varies from country to country. We cannot advise whether a particular use of a particular book is legal. Do not assume that a book's appearance in Google Book Search means that it is available in your country.

About Google Book Search

Google's goal is to organize the world's information and make it universally usable and accessible. Google Book Search helps readers discover the world's books and supports authors and publishers by putting more books into circulation. The Wah! Hansemann's was therefore an extremely fortunate wise and clever. But the plan failed a circumstance that Hansemann did not pay attention to had, because such things had never been an obstacle to him Müller had been offered the position – too much character!

Mr. Hansemann wanted to kill two birds with one stone Firstly, he wanted to beat his only co-director Meyer Goldschmidt, who for a long time was the soul of the . had been there, especially since he was ill. Hansemann, then still red-blooded, now attracted more and more the decision about all business and 'developed, as even his opponents praise him, as much diligence as – in view of his small Education – surprising skill. This autocracy which the old merchant Goldschmidt had given him Hansemann found too much taste, than he would have wanted to give it up later, and as gold schmidt had to resign because of his illness, thought Mr Hansemann does not even think about a real follow-up successor for him on the director's chair of the Disconto-Gesellschaft.
